Forward-looking statements include statements concerning our plans, objectives, goals, strategies, future events, future revenues or financial performance, capital expenditures, financing needs, plans or intentions relating to acquisitions, our competitive strengths and weaknesses, our business strategy and the trends we anticipate in the industry and the political and legal environment, and geographical locations, in which we operate, and other information that is not historical information.

Words such as “aims”, “anticipate”, “believe”, “could”, “continue”, “estimate”, “expect”, “future”, “goal”, “intend”, “is likely to”, “may”, “plan”, “predict”, “project”, “seek”, “should”, “targets”, “would” and similar expressions, or variations of such expressions, are intended to identify forward-looking statements but are not the exclusive means of identifying such statements.

By their nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that the predictions, forecasts, projections and other forward-looking statements will not be achieved.

These risks, uncertainties and other factors include, among other things, those listed under “*Risk Factors*”, as well as those included elsewhere in this Letter of Offer. Prospective investors should be aware that a number of important factors could cause actual results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include, but are not limited, to:

- Adverse outcome in any of the litigations involving the Company and Group Company;
- Our ability to successfully implement strategic initiatives of our new management;
- Equity Shares issued in the last 12 months at a price which may be lower than the Issue Price;
- The trade volume of Equity Shares may also continue to be low or further reduce, adversely affecting the price of our Equity Shares;
- Certain of our corporate records not being traceable;
- Volatility in interest rates;
- Retention of senior management team;
- Our ability to compete effectively in the lending business;
- Continued access to third party data sources that we rely on to perform certain key functions; and
- Relaxations in the security coverage ratio requirements with respect to loan facilities granted by us.

For a further discussion of factors that could cause our actual results to differ, please refer to the section titled “*Risk Factors*” on page 15 of this Letter of Offer. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual future gains or losses could materially differ from those that have been estimated. Neither we nor the Lead Manager make any representation, warranty or prediction that the results anticipated by such forward-looking statements will be achieved, and such forward-looking statements represent, in each case, only one of many possible scenarios and should not be viewed as the most likely or standard scenario. Neither we nor the Lead Manager nor any of their respective affiliates or advisors have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition. In accordance with SEBI / Stock Exchange requirements, we and Lead Manager will ensure that the Eligible Shareholders are informed of material developments until the time of the grant of listing and trading permissions by the Stock Exchange.

SECTION II - RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all the information in this Letter of Offer, including the risks and uncertainties described below, before making an investment in the Equity Shares. If any, or some combination, of the following risks actually occur, our business, cash flows, prospects, results of operations, and financial condition could materially suffer, the trading price of the Equity Shares could decline, and you may lose all, or part, of your investment.

We have described the risks and uncertainties that we believe are material, but these risks and uncertainties may not be the only ones we face. Additional risks and uncertainties, including those we are not aware of or deem immaterial, may also result in decreased revenue, increased expenses or other events that could result in a decline in the value of the Equity Shares. In making an investment decision, prospective investors must rely on their own examination of us and the Issue, including the merits and risks involved. Investors should consult their own counsel and advisors as to business, investment, legal, tax, accounting and related matters concerning this Issue.

This Letter of Offer also contains forward-looking statements that involve risks and uncertainties. Our results could differ materially from such forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Letter of Offer. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Unless otherwise stated, our financial information used in this section is derived from our Restated Standalone Financial Information.

INTERNAL RISK FACTORS

- 1. Our Company and Group Company are party to certain outstanding litigations, and any adverse outcome in any of these proceedings, may have a material adverse impact on our business and financial condition.**

There are certain outstanding litigation against our Company and our Group Company. These proceedings are pending at different levels of adjudication before various courts, tribunals, quasi-judicial authorities and appellate tribunals. A summary of material proceedings involving our Company and Group Company as of the date of this Letter of Offer is set forth below:

I. Litigation against our Company

(Amount in ₹)

Sr. No.	Nature of litigation	Number of cases	Approximate amount involved
1.	Tax proceedings	5	3,070
Total		5	3,070

II. Litigation against the Group Company

(Amount in ₹)

Sr. No.	Nature of litigation	Number of cases	Approximate amount involved
1.	Statutory or regulatory action	1	23.16 million
2.	Criminal proceedings	1	-
3.	Tax proceedings	10	56.98 million
4.	Material civil proceedings	2	96.49 million
Total		14	176.63 million

The amounts claimed in these legal proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. If any new developments arise, such as rulings against us by appellate courts or tribunals, we may need to make provisions in our financial information that could increase our expenses and current liabilities.

We cannot assure you that these legal proceedings will be decided in favour of our Company or our Group Company, as the case may be, or that no further liability will arise out of these proceedings. Further, such legal

proceedings could divert management time and attention and consume financial resources. Any adverse outcome in any of these proceedings may adversely affect our profitability and reputation and may have an adverse effect on our results of operations and financial condition.

2. *We face several risks associated with the change in our management and if we are unable to successfully implement strategic initiatives of our new management, our business, results of operations, financial condition and cash flows may be adversely affected.*

While our Company has been in existence for over two decades, our current Promoter, Capital India Corp LLP, completed the acquisition of Equity Shares from our erstwhile promoter pursuant to the Capital India SPA and from our public shareholders through an open offer, in December 2017. Our new and dynamic senior management team has implemented a number of changes in the Company. However, as a part of the management change, we are susceptible to potential difficulties, including: (i) lack of past experience of our Promoter in the NBFC sector; (ii) developing a sound culture, ethos and conducive work environment in our operations; (iii) challenges involved in recruiting, training, retaining and building a team of qualified personnel; (iii) diversifying from real estate focused lending to sector agnostic lending; (iv) developing and enhancing internal policies, controls and administrative infrastructure; and (v) leveraging the existing relationships of our senior management team to develop a sustainable business. If we are unable to overcome the potential difficulties associated with the management change, the strategic initiatives of our new management team may not be successfully implemented fully, or at all, or may take longer to realise than expected. Our failure to successfully implement initiatives on time, or at all, could have an adverse effect on our business, results of operations, financial condition and cash flows.

3. *Our Company has issued Equity Shares in the last 12 months at a price which may be lower than the Issue Price. Further, the average cost of acquisition of Equity Shares by our Promoter may be lower than the Issue Price.*

The details of Equity Shares issued by our Company in the last one year preceding the date of filing of this Letter of Offer which may have been issued at a price lower than the Issue Price are as follows:

Sr. No.	Name of allottees	Whether allottee belongs to Promoter Group	Date of allotment	Number of Equity Shares	Face value (₹)	Issue price per Equity Share	Reason for/ Nature of allotment
1	Capital India Corp LLP, Samrat Banerjee, Dharampal Satyapal Limited, Sudhir Power Limited, RJ Corp Limited, Vasudevan Sathyamoorthy.	Except for our Promoter, none of the allottees belonged to the Promoter Group.	June 8, 2018	39,683,000	10	63	Preferential Allotment

The price at which our Company has issued the Equity Shares in the preceding 12 months is not indicative of the price at which they will be traded. Further, the average cost of acquisition of Equity Shares by our Promoter is ₹ 59.12, which may be lower than the Issue Price.

4. *The increase in the trading price of our Equity Shares during the past year is not indicative of the financial performance of our Company's lending business, and such trading price may not continue to grow in line with past trends. The trade volume of our Equity Shares may also continue to be low or further reduce, adversely affecting the price of our Equity Shares.*

The trading price of our Equity Shares has shown significant movement since the change in management control of our Company in November 2017, increasing from ₹ 33.85 as on November 30, 2017 to ₹ 199, as on November 30, 2018. The highest and lowest closing market price of the Equity Shares during the intervening period were ₹ 343.35 (as on June 28, 2018) and ₹ 33.85 (as on November 30, 2017), respectively. Despite the increase in the price, the average trading volume of our Equity Shares during this period has not increased significantly.

Further, during such period, while the trading price of the Equity Shares has increased multiple times, there has only been a marginal increase in the revenue of our Company from its lending business. Accordingly, there may not be any correlation between the steep increase in the trading price vis-à-vis the past financial performance of the lending business of our Company. Further, there can be no assurance that trading price of our Equity Shares will increase or decrease in line with the business of the Company or its financial performance.

We cannot guarantee that the trading price of our Equity Shares will move in a manner consistent with past trends. The trading price of the Equity Shares may be subject to volatility as a result of several factors beyond our control, including a downturn in the Indian and global securities markets, our results of operations, the performance of our competitors, investor perceptions of our future performance, adverse media reports about us or our sector, changes in the estimates of our performance or recommendations by financial analysts, significant developments in India's economic liberalization and deregulation policies, and significant developments in India's fiscal regulations. Each of these factors, among others, may adversely affect the trading price of our Equity Shares. Further, we cannot assure you that there will be an active or liquid market for the trading of our Equity Shares, or that there will be an increase in the volume of our Equity Shares being traded on BSE Limited.

For further details, see “*Stock Market Data for Equity Shares of our Company*” on page 204 of this Letter of Offer.

5. *Certain of our corporate records are not traceable.*

Certain of our corporate records, such as the initial memorandum of association of our Company are not traceable. Despite having conducted an internal search of our records, and a search in the records of the RoC Delhi, we have been unable to retrieve the aforementioned document. Accordingly, we have relied on other documents, including relevant form filings and the resolutions passed by our Board and Shareholders, for the disclosure of amendments to our Memorandum of Association, in this Letter of Offer. We cannot assure you that our initial Memorandum of Association will be available in the future.

6. *Our business is vulnerable to volatility in interest rates which could adversely affect our income from our operations, our financial performance and consequently affect our profitability.*

An increase in interest rates applicable to our liabilities, without a corresponding increase in interest rates applicable to our advances would result in a net decline in our income from financing activity. Our net interest income (interest income less interest expenses) for Fiscal Years 2016, 2017 and 2018, and the three-month period ended June 30, 2018 was ₹ 4.77 million, ₹ 3.54 million, ₹ 37.49 million and ₹ 37.49 million, respectively. Our interest income is affected by any volatility in interest rates.

Interest rates are highly sensitive to many factors beyond our control, including the monetary policies of the RBI (including fluctuations in the liquidity ratios), domestic and global macro-economic conditions. Further, in the event of sharp rise in the interest rates, our borrowers who usually pay us a fixed interest rate may repay/ pre-pay their loans with us and switch to our competitors, who may have access to low-cost funds or lower cost deposits. In addition, potential customers may be deterred from entering into any financing arrangements in an increasing interest rate scenario. Any inability on our part to retain or attract customers because of rising interest rates could adversely affect our income from our operations, our financial performance and consequently affect our profitability.

7. *Our business depends substantially on the continuing efforts of our senior management team and our business operations may be severely disrupted if we lose their services.*

While we have been in existence for over two decades, our current Promoter, Capital India Corp LLP, completed the acquisition of Equity Shares from our erstwhile promoter pursuant to the Capital India SPA and from our

public shareholders through an open offer, in December 2017. Consequently, our leadership positions were changed to bring in place a new senior management team having significant experience in the banking, financial services, consultancy and infrastructure sectors. A significant majority of our senior management team have joined our Company in the last Fiscal Year. Our continued success and growth will depend, to a large extent, on our ability to retain the services of our senior management team and heads of our functional groups, such as real estate finance, structured finance, risks, strategy, and operations and service. There is no assurance, however, that these individuals will not leave us or join a competitor who may offer higher remuneration. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with us. We may also be required to increase our levels of employee compensation more rapidly to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an adverse effect on our business, results of operations, cash flows and financial condition. Further, we do not currently maintain key-person insurance.

8. *We face intense competition in our lending business, which may result in declining margins if our Company is unable to compete effectively.*

Our competitors in the lending business include established scheduled commercial banks, NBFCs, small finance banks and other financial institutions that offer similar financing products and services. In addition, due to the nature of our business, our Company may lose our customers to our competitors, who may have access to low-cost funds or lower cost deposits. Significant increases in the number and size of competitors for our business could result in a decrease in the number of loans that we fund, resulting in lower levels of revenue and earnings.

The RBI has liberalized the licensing regime for banks in India and intends to issue licenses on an ongoing basis, subject to meeting the criteria laid down by RBI. The RBI is supportive of creating more specialized banks and granting differentiated banking licenses such as for payment banks and small finance banks. The RBI also has plans to create wholesale and long-term finance banks in the near future. In November 2014, the RBI released guidelines for licensing of payment banks and for licensing of small finance banks in the private sector. On August 19, 2015 the RBI granted in-principle approval to 11 applicants to set up payment banks. In September 2015, the RBI granted in-principle licenses to 10 applicants for small finance banks. The RBI has also released guidelines with respect to a continuous licensing policy for universal banks in August 2016. The RBI has also put in the public domain, on April 7, 2017, a discussion paper on wholesale and long-term finance banks. We believe that these developments will further intensify the competition in the financial services sector. Some of the public, private sector, and foreign banks have subsidiaries and affiliates operating as NBFCs with significant market share, distribution reach and product portfolio, and our Company also competes with them for our lending business. Further, certain commercial banks may have access to a wide branch and distribution network, enabling them to market their products and services to more customers. Liberalization of the Indian financial services sector could also lead to a greater presence or new entries of Indian and foreign banks, NBFCs and other entities operating in the financial services sector offering a wider range of products and services, including personal loans, which could adversely affect our competitive environment. There can be no assurance that our Company will be able to react effectively to these or other market developments or compete effectively with new and existing players in the increasingly competitive lending business. Increasing competition may also result in relatively slower growth and lower net interest margin, and consequently may have an adverse effect on our results of operations and financial condition.

9. *Our Company relies on third party data sources to perform certain key functions and any failure to access those data sources as a result of operational or technological failure, including cybersecurity attacks on our third-party data sources could result in the interruption of our operations and systems and could result in significant costs and reputational damage to us.*

Our Company relies on third-party data sources for credit assessment of our borrowers. For instance, the applicant's details will be sourced from various websites, payment bureaus and third-party vendors. Some of these third-party data sources are currently, and may, in the future, be vulnerable to data privacy violation claims. If these claims are established and these data sources are no longer available to us, our Company will have to find alternate sources for such data which may increase our operational costs and adversely impact our results of operations. These third-party data sources are also susceptible to operational and technology vulnerabilities and

are also exposed to changes in regulations, which may impact our business. In addition, these third-party data sources may rely on other parties (sub-contractors), to provide services to us which also face similar risks.

While we have not experienced any significant failures or security breaches by or of our third party data sources or their sub-contractors in the past, however, any such future instances, including any actual or perceived cybersecurity attacks, security breaches, fraud, phishing attacks, acts of vandalism, information security breaches and computer viruses which could result in unauthorized access, misuse, loss or destruction of data, an interruption in extraction of data or other similar events could interrupt our business, cause us to incur losses, subject us to fines or litigation and harm our reputation. An interruption in or the cessation of service by any third-party data source and our inability to make alternative arrangements in a timely manner could have a material impact on our ability to offer certain products and services and cause us to incur losses. We cannot assure that any of these third-party data sources or their subcontractors will be able to continue to provide their products and services in an efficient, cost effective manner, if at all, or that they will be able to adequately expand their services to meet our needs and those of our customers. Our Company may incur significant additional costs to implement enhanced protective measures and technology, to investigate and remediate vulnerabilities or other exposures or to make required notifications.

10. The security coverage ratio requirements with respect to loan facilities granted by us may be further relaxed, on a case to case basis.

At the time of entering into lending arrangements with its customers, our Company typically requires the borrower to maintain a stipulated security cover with respect to the facility. The required security coverage as per our Company's internal credit policy varies across product offerings, being 1.5 times the loan amount for real estate financing, lease rental discounting products and non-convertible debentures, among others. For structured finance products, however, the financing may be unsecured or be secured.

While indicative security coverage ratios have been stipulated for the respective product offerings in our Company's internal credit policies, the actual terms of financing are approved on a case to case basis by the appropriate sanctioning authority and may be further revised. Further, the sanctioned terms may subsequently be revised by the appropriate sanctioning authority, based on the recommendation of the business/ credit team. For instance, in the past, our Company has reduced the security coverage ratio of one of its facilities from '2 times the loan amount' to '1.35 times the loan amount'. Therefore, we cannot guarantee that the security coverage ratio requirements with respect to loans and advances disbursed by our Company will not be relaxed in the future, or that the terms of sanction of future loans and advances will not have lower security coverage requirements. For details of the credit approval procedure, see "*Our Business - Credit Approval Procedure*" on page 102.

11. Our business will require substantial funds, and any disruption in funding sources would have a material adverse effect on our liquidity and financial condition.

Our business depends and will continue to depend on our ability to access diversified low-cost funding sources. Historically, our Company has relied on internal accruals and raising of capital through equity and inter-corporate deposits, which enabled us to keep our funding cost low. Recently, in June 2018, funds aggregating to approximately ₹ 2,500 million were mobilized for the business, operational and general corporate requirements of our Company. However, as our Company continues to grow its business, it will, in large part, be dependent upon our timely access to, and costs associated with raising capital including by borrowings from banks and lenders. Additionally, as an NBFC, our Company faces certain regulatory restrictions on its ability to obtain financing from banks. Any change in the RBI regulations on onward lending to NBFCs, could further impair our ability to develop and maintain relationships with banks. Our average cost of borrowings in the Fiscal Years 2016, 2017 and 2018, and the three-month period ended June 30, 2018 was 14.24%, 13.11%, 10.20% and 9.99%, respectively.

Pursuing our growth strategy will also have an impact on our long-term capital requirements. With the growth of our business, we may be increasingly reliant on funding from capital markets. The market for such funds is competitive and our ability to obtain funds at competitive rates will depend on various factors. If we are unable to access funds at an effective cost that is comparable to or lower than our competitors, we may not be able to offer competitive interest rates for our loans. Our ability to raise funds on acceptable terms and at competitive

rates continues to depend on various factors, including the regulatory environment and policy initiatives in India, lack or inadequacy of liquidity in the market, developments in the international markets affecting the Indian economy, investors' and/or lenders' perception of demand for debt and equity securities of NBFCs, and our current and future results of operations and financial condition. If we are unable to obtain adequate financing or financing on terms satisfactory to us and in a timely manner, our ability to grow or support our business and to respond to business challenges could be limited and our business prospects, liquidity and financial condition may be materially and adversely affected.

12. *We may not be able to recover our loans on a timely basis, or at all, the full value of collateral or amounts which are sufficient to cover the outstanding amounts due under such defaulted loans. Our inability to recover outstanding amounts under loans may adversely affect our business prospects, financial condition and results of operations.*

As of March 31, 2016, March 31, 2017, March 31, 2018 and June 30, 2018, Nil, 89.71 % (i.e., ₹ 785.00 million), 89.42 % (i.e., ₹ 929.43 million) and 88.79 % (i.e., ₹ 871.03 million), respectively, of our loans and advances relating to financing activity were secured. Depending upon the nature of product, our financings are secured typically by way of mortgage, hypothecation and/ or charge over property, escrow over project receivables, and other movables assets, personal guarantees of promoters or directors, corporate guarantee and a term deposit (debt service reserve account) in the form of bank fixed deposits lien marked in our favor. In certain instances, we obtain pledge of marketable securities or fixed deposits from our customers at the time of disbursement.

There can be no assurance that we will be able to sell such securities, or properties provided as collateral at prices sufficient to cover the amounts under default, or that we would be able to invoke personal and corporate guarantees. In addition, there may be delays associated with such processes. Further, certain ownership documents of the immovable properties that are mortgaged to us may not be duly registered or adequately stamped. Failure to adequately stamp and register a document renders the document inadmissible in evidence. While we have not experienced any such situation in the past, however, there can be no assurance that any document of the immovable properties that are mortgaged to us will not be subsequently considered as invalid, on account of *inter alia*, any varying interpretation of administrative/ judicial authorities and we may not be able to successfully retrieve payments due to us.

In certain cases, third parties may also allege irregularities in the manner such securities may have been created. For instance, a complainant has filed a complaint with the RBI, alleging irregularities on our part in relation to creation of mortgage over certain land parcel in Goa. As part of an ongoing title diligence exercise in relation to said land parcel, we had issued a public notice disclosing the creation of first ranking exclusive mortgage by the concerned borrower in our favour, however, the complainant has alleged that such public notice should have been published before creation of the mortgage, and sought that the RBI may revoke the approval given to the management of our Company. We have replied to the RBI responding to the abovementioned allegations.

Consequently, should any default arise in relation to the corresponding loans, we may be unable to, or may incur additional expenses to, enforce our rights in relation to such securities. Further, if any of our borrowers take recourse of arbitration or litigation against our repayment claims, or in the event any disputes over such security are ongoing with third parties before any forum, it may cause a further delay in our recovery process leading to depreciation of the secured asset. A failure or delay in recovering the expected value from sale of collateral security could expose us to a potential loss. Any such losses could adversely affect our business prospects, financial condition and results of operations.

13. *We require certain statutory and regulatory approvals, licenses, registrations and permits for conducting our business and our inability to obtain, retain or renew them in a timely manner, or at all, may adversely affect our operations.*

We require a number of approvals, licenses, registrations and permits for our business. Our wholly-owned subsidiary, Capital India Home Loans, has applied to the National Housing Bank for seeking permission to carry on the business of a housing finance institution. This application is currently pending.

We may need to apply for renewal of approvals which may expire in the ordinary course. The approvals required by us are subject to numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged noncompliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, or if there is any adverse interpretation of applicable regulations by any judicial, regulatory or administrative authority, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business. If we fail to comply with applicable statutory or regulatory requirements, there could be a delay in the submission or grant of approval for carrying out our business. If we fail to obtain or renew such approvals, licenses, registrations and permissions, in a timely manner, or at all, our business, results of operations and financial condition may be adversely affected. For further details of key regulations applicable to our business and our operations, see “*Regulations and Policies*” on page 108 and for details of pending approvals relating to our business and operations, see “*Government and Other Approvals*” on page 231.

14. *We may face asset-liability mismatches, which could affect our liquidity and consequently may adversely affect our operations and profitability.*

We face potential liquidity risks because our assets and liabilities mature over different periods. We may have to rely on funding options with short term maturity periods for extending long term loans, which may lead to an asset-liability mismatch. Further, any future mismatches between our assets and liabilities will be compounded in case of pre-payment of financing facilities we grant to customers. As per our Asset Liability Management Policy, we cover (i) liquidity risk management (structural liquidity plan and dynamic liquidity plan), (ii) interest risk management system and (iii) funding and capital planning. We have also constituted an Asset-Liability Committee to address the foregoing risks. We have not experienced any asset-liability mismatch in the last five years preceding the date of this Letter of Offer. However, we cannot assure that we will not face any asset-liability mismatch in the future, which could affect our liquidity and consequently may adversely affect our operations and profitability.

For details of our ALM Policy, see “*Our Business – ALM Policy*” on page 101.

15. *Changes in the regulatory framework could adversely affect our operations and growth prospects.*

The regulatory and policy environment in which we operate is evolving and subject to change. Being an NBFC, we are subject to various regulations and policies, including, but not limited to the regulations and directives framed by RBI. The RBI also regulates the credit outflow by banks to NBFCs and has issued guidelines to commercial banks with respect to their investment and credit exposure norms for lending to NBFCs. Also, see “*Regulations and Policies*” on page 108.

The introduction of GST with effect from July 1, 2017 has resulted in an increase in the cost of tax compliance, which has moved to state-level tax compliance compared to the centralized tax compliance pre-GST. The rate of GST on financial services, excluding interest revenue, is 18.0%, compared to the 15.0% service tax rate payable pre-GST. As against other companies, which are allowed 100.0% of the input tax credit, NBFCs are required to reverse 50.0% of the input tax credit under GST as well as the erstwhile service tax regime. However, due to the increase in the tax rate, our input tax credit reversal has increased from 7.5% under service tax to 9.0% under GST for most of the services that we avail, resulting in additional costs. In addition, the introduction of the payment of GST on a reverse charge basis for the procurement of taxable goods and services from any unregistered person will also increase our costs considering the fact that we are required to reverse 50.0% of the input tax credit paid under the reverse charge as well. This impact is expected to be partially offset by the fact that we are entitled to avail input tax credit on purchase of goods, which pre-GST was not available, and the fungibility of taxes on goods and services.

The RBI, from time to time, amends the regulatory framework governing NBFCs. Further, uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, any governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, there can be no assurance that we will succeed

in obtaining all requisite regulatory approvals in the future for our operations or that regulatory compliance issues will not be raised in respect of our operations, which could have a material adverse effect on our business, financial condition and results of operations.

16. *We have substantial exposure to real estate sector and if these exposures become non-performing, it could affect our business, financial condition and results of operations.*

Following the change in management control of our Company in December 2017, we have expanded our targeted customer group from the real estate sector to position ourselves as sector agnostic lender. While our real estate lending, in the Fiscal Year 2018, has come down to 37.0%, as compared to 70.0% of our lending portfolio in the Fiscal Year 2017, it still constitutes a substantial part of our asset portfolio. Further, as of June 30, 2018, the real estate lending constitutes 27.4% of our asset portfolio.

Any significant difficulty in real estate sector, driven by events not within our control, such as local and economic conditions, slump in the demand for properties, changes in the applicable governmental regulations, demographic trends, employment and income levels and interest rates, among other factors, could adversely impact the ability of customers to service their debt obligations to us. Further, during economic downturns, market sentiment for real estate projects may be adversely affected, buyers may become cautious, rentals of office space may face downward pressure and sales or collections of our real estate customers could be adversely affected. Consequently, our business, results of operations, cash flows and financial condition have been and will continue to be partly dependent on the performance of, and the prevailing conditions affecting, the real estate sector. As a result, we would experience increased delinquency risk, which may materially and adversely impact our business, prospects, financial condition and results of operations.

Further, the Government of India has introduced the Real Estate Act to regulate the real estate sector and has imposed certain obligations on real estate developers, such as mandatory registration of real estate projects, maintenance of a separate account for amounts realized from each real estate project and restrictions on withdrawal of amounts from such accounts. The implementation of the Real Estate Act is still ongoing, including by various states in India, and we cannot assure you that our customers from the real estate sector will not be impacted by any further rules or regulations announced by the Government of India or such state Governments. Further, if our customers are subjected to penal action by the adjudicating authority under the Real Estate Act, it may affect their ability to repay loans.

17. *Our Promoter will continue to have the ability to control or influence the outcome of matters submitted to Shareholders for approval and their interests may differ from those of other Shareholders.*

Our Promoter currently owns 68.58% of the outstanding Equity Shares. Our Promoter has given an undertaking that it will subscribe in the Issue at least to the extent of its entitlement. Upon allotment in the Issue, our Promoter will continue to hold similar number of outstanding Equity Shares (assuming it will subscribe in the Issue, to the extent of its entitlement). As long as our Promoter continues to hold a significant ownership stake in our Company, it will have the ability to control or influence the outcome of any matter submitted to our Shareholders for approval, including matters relating to sale of all or part of our business, mergers or acquisitions; disposal of assets; the distribution of dividends; appointment or removal of our directors or officers; and our capital structure or financing. This control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company, even if it is in the best interests of other shareholders of our Company. Our Promoter may have interests that are adverse to the interests of our Shareholders and may take positions with which our other Shareholders do not agree.

18. *Our business is concentrated around limited number of borrowers. If we fail to retain these borrowers or if we fail to expand our borrower base, our business, results of operations, cash flows and financial condition may be materially adversely affected.*

Our business is concentrated around limited number of borrowers. Our exposure to our single largest borrower as on March 31, 2016, 2017 and 2018, and June 30, 2018 was ₹ 502.50 million, ₹ 150 million, ₹ 549.23 million and ₹ 549.23 million, representing 98.0%, 17.0%, 53.0% and 55.99% of our total exposure as on such date. Further,

as of March 31, 2016, 2017 and 2018, and June 30, 2018 we had five, 10, six and six borrowers, respectively. If we fail to retain our borrowers, or if any of our existing borrowers choose to repay their loans with us, if such loans become non-performing, or if we are unable to attract a broader range of borrowers, it would have a material adverse effect on our business, results of operations, cash flows and financial condition.

19. We have in the past failed to comply with the relevant provisions of the SEBI Listing Regulations and the erstwhile listing agreement entered into by us with BSE.

We have, in the past, inadvertently failed to comply with certain reporting obligations in terms of the erstwhile listing agreement entered into with the BSE. For instance, we missed filing of our shareholding pattern for the three-month period ended September 30, 2004, within the prescribed time limit. Consequently, the BSE had temporarily suspended trading of our Equity Shares with effect from December 21, 2004. Thereafter, upon completion of requisite formalities, the suspension on trading of our Equity Shares was revoked by the BSE with effect from December 1, 2008.

Additionally, as a public listed company, the limited review and the audit reports submitted by us to the Stock Exchange are required to be provided by auditors who have subjected themselves to the peer review process of ICAI and hold a valid certificate issued by the "Peer Review Board" of the ICAI. Our statutory auditor for the Fiscal Year 2018, namely, M/s Divyank Khullar & Associates, had consented and confirmed to us their eligibility to act as our statutory auditor in accordance with the Companies Act, 2013. It has come to our knowledge while they are a registered member of the ICAI, they did not hold a valid peer review certificate. Accordingly, in terms of the applicable provisions of the SEBI Listing Regulations, we may be subject to regulatory actions. We have appointed Deloitte Haskins & Sells LLP, Chartered Accountants, a registered member of ICAI, holding a valid certificate issued by the "Peer Review Board" of the ICAI, as the statutory auditor of the Company with effect from May 3, 2018. Further, we have also got Deloitte Haskins & Sells LLP, Chartered Accountants to conduct a special purpose audit of our financials for the Fiscal Year 2018 which has been approved by our Board on August 7, 2018 and there were no qualifications that were made by Deloitte Haskins & Sells LLP.

20. We have had instances of non-compliances in relation to maintenance of leverage ratios and minimum net owned fund prescribed by the RBI which may lead to regulatory actions.

Pursuant to the Master Directions, with effect from March 31, 2015, we are required to maintain the leverage ratio (i.e., outside liabilities/ owned funds) of not more than seven at all points of time. However, our leverage ratios during the last three Fiscal Years exceeded the prescribed regulatory requirement. Our leverage ratios at the end of periods mentioned below, were as follows:

Particulars	March 31, 2016	March 31, 2017	March 31, 2018	June 30, 2018
Leverage Ratio* (in times)	14.88	35.24	23.35	0.04

*Leverage Ratio means the total Outside Liabilities/ Owned Funds.

Outside Liabilities = Advance towards share application money + Long-term borrowings + short-term borrowings + other long-term liabilities + other current liabilities.

"Owned funds" means paid up equity capital, preference shares which are compulsorily convertible into equity, free reserves, balance in share premium account and capital reserves representing surplus arising out of sale proceeds of asset, excluding reserves created by revaluation of asset, as reduced by accumulated loss balance, book value of intangible assets and deferred revenue expenditure, if any.

Additionally, as an NBFC, we are required to maintain the minimum net owned fund of ₹ 20 million. Our net-owned funds as of March 31, 2018, i.e., ₹ (85.30) million, was below the prescribed regulatory requirement.

In June 2018, our Company raised ₹ 2,500 million through a preferential allotment of Equity Shares and thereby meeting the leverage ratio and net-owned fund requirements. However, there is no assurance that RBI will not take any action for breaches by our Company in the past. If we are subject to any such action, it may materially affect our business.

21. *Once we become a ‘Systemically Important NBFC’, we will be subject to stringent regulatory requirements and prudential norms which could adversely affect our business, financial conditions and results of operations.*

Presently, we are a “Non-Systemically Important Non-Deposit taking NBFC”. However, once we become a ‘Systemically Important NBFC’, we will be subject to more stringent regulations and compliance framework. The requirements that are applicable to ‘Systemically Important NBFCs’ in terms of the regulatory framework are significantly more stringent and may require our Company to incur significant costs to ensure compliance. We will be subjected to the ‘Master Direction - Non-Banking Financial Company - Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016’ once we become a ‘Systemically Important NBFC’. For instance, as per these master directions, every ‘Systemically Important NBFC’ is required to maintain a minimum capital ratio consisting of Tier I and Tier II capital of not less than 15% of its aggregate risk weighted assets on-balance sheet and risk adjusted value of off-balance sheet items. This requirement is not presently applicable to us. We will also be subject to other notifications, circulars etc., issued by the RBI for monitoring the operations of ‘Systemically Important NBFCs’, including but not limited to the Monitoring of Frauds in NBFCs (Reserve Bank) Directions, 2016, whereby we will be required to put in place a reporting system for recording frauds. In the event of failure to comply with the applicable directives and reporting requirements, the RBI may impose penalties, restrict business activities or otherwise enforce increased scrutiny and control over our operations. The additional costs that may be incurred by our Company in order to ensure compliance with the RBI regulations applicable to ‘Systemically Important NBFCs’, including in relation to maintenance of capital adequacy ratios, reporting of frauds, or a delay or non-compliance thereof, may significantly affect our business, reputation, results of operations, financial condition and prospects.

22. *An inability to manage our growth in our lending business may place significant demands on our management and our infrastructure and could be costly.*

If we achieve significant rapid growth in our lending business, such growth may place significant demands on our management and our operational and financial infrastructure. Expanding our products or entering into new markets can be costly and require significant management time and attention. Additionally, as our operations grow in size, scope and complexity and our product offerings increase, we will need to enhance and upgrade our systems and infrastructure to offer an increasing number of enhanced solutions, features and functionality. The expansion of our systems and infrastructure will require us to commit substantial financial, operational and technical resources in advance of an increase in the volume of business, with no assurance that the volume of business will increase. Continued growth could also strain our ability to maintain reliable service levels for our customers, develop and improve our operational, financial and management controls, develop and enhance our legal and compliance controls and processes, enhance our reporting systems and procedures and recruit, train and retain highly skilled personnel. Managing our growth will require significant expenditures and allocation of valuable management resources. Failure to achieve the necessary level of efficiency in our organization as it grows could materially adversely affect our business, prospects, results of operations, financial condition and cash flows and could impair our ability to continue current operations.

23. *Due to the limited information regarding loan servicing histories of customers in India, we may be at a higher risk compared to financial sector companies with lending operations in more developed countries.*

For certain key elements of the credit assessment process, we depend on the accuracy and completeness of information furnished by the customers and counterparties and any misrepresentation, errors or incompleteness of such information could cause our business to suffer. Our principal activity is providing financing to borrowers. The credit risk of our borrowers may be higher than in other economies due to the higher uncertainty in our regulatory, political and economic environment. In addition, India’s system for gathering and publishing statistical information relating to the Indian economy generally or specific economic sectors within it or corporate or financial information relating to companies or other economic enterprises may not be as comprehensive as those of several countries with established market economies.

For ascertaining the creditworthiness and encumbrances on collateral we may depend on the respective registrars and sub-registrars of assurances, credit information companies or credit bureaus, and on independent valuers in relation to the value of the collateral, and our reliance on any misleading information given may decrease the

accuracy of our assessments of credit risk, thereby increasing the likelihood of borrower default on our loan and decreasing the likelihood that we would be able to enforce any security in respect of such a loan or that the relevant collateral will have a value commensurate to such a loan. Moreover, the availability of accurate and comprehensive credit information on individuals and small businesses in India is more limited than for larger corporate customers, which reduces our ability to accurately assess the credit risk associated with such lending. Difficulties in assessing credit risks associated with our day-to-day lending operations may cause our assets becoming non-performing or may require to be restructured.

- 24. *Our operations are concentrated in Delhi and Mumbai. Additionally, we may not be successful in expanding our business to other parts of India which could have an adverse effect on our business, financial condition and results of operations.***

Historically, our presence was limited to Delhi. In November 2017, we opened our Corporate Office in Mumbai. However, our competitors already have established operations in other locations in India and while we currently don't have any plans for geographic expansion, we may find it difficult to attract customers from other geographies as and when we decide to expand geographically. Due to our presence being limited to Delhi and Mumbai, we may not be able to successfully expand into new markets or increase our customer base, which could have a material adverse effect on our business, financial condition and results of operations.

- 25. *If we fail to identify, monitor and manage risks and effectively implement our risk management policies, it could have a material adverse effect on our business, financial condition, results of operations and cash flows.***

We have devoted significant resources to develop our risk management architecture and procedures and plan to continue to do so in the future. However, there can be no assurance that our policies and procedures to identify, monitor and manage risks will be fully effective. Some of our risk management procedures may not be automated and could be subject to human error, while certain of our risk management methods are based on observed historical market behavior. As a result, these methods may not accurately predict future risk exposures, which could be significantly greater than those indicated by the historical measures. To the extent any of the instruments and strategies which we may use to hedge or otherwise manage our exposure to market or credit risk are not effective, we may not be able to mitigate effectively our risk exposures in particular market environments or against particular types of risk. Further, some of our risk management strategies may not be effective in a difficult or less liquid market environment, where other market participants may be attempting to use the same or similar strategies to deal with the difficult market conditions. In such circumstances, it may be difficult for us to reduce our risk positions due to the activity of such other market participants. Other risk management methods depend upon an evaluation of information regarding markets, clients, borrowers or other matters. This information may not in all cases be accurate, complete, up-to-date or properly evaluated. Our earnings in the lending business are dependent upon the effectiveness of our management of changes in credit quality and risk concentrations, the accuracy of our valuation models and our critical accounting estimates and the adequacy of our allowances for loan losses. To the extent our assessments, assumptions or estimates prove inaccurate or not predictive of actual results, we could suffer higher than anticipated losses. If we fail to effectively implement our risk management framework, it could materially and adversely affect our business, financial condition, results of operations and cash flows.

- 26. *As an NBFC, we are subject to periodic inspections by the RBI. Non-compliance with observations made by RBI during these inspections could expose us to penalties and restrictions.***

The RBI has a right to conduct periodic inspection on us pursuant to section 45N of the Reserve Bank of India Act, 1934 (the "**RBI Act**"). Accordingly, the RBI may inspect our books of accounts and other records to verify the correctness or accuracy of any statement, information or particulars furnished to the RBI. If we are unable to resolve any deficiencies to RBI's satisfaction, our ability to conduct business may be restricted. Imposition of any penalty or adverse findings by the RBI during any future inspections may have an adverse impact on our business prospects, financial condition and results of operations.

- 27. *The requirement and deployment of the Net Proceeds have not been independently appraised and are based on management estimates.***

The requirement and deployment of the Net Proceeds have not been appraised by any bank or financial institution. Our Company may have to revise its management estimates from time to time and consequently our funding requirements may also change. Our management will have flexibility over the use of the Net Proceeds. We intend to use the Net Proceeds of the Issue towards augmenting our capital base to meet our future capital requirements, in accordance with applicable law, and in the manner indicated in “*Objects of the Issue*” on page 69.

Our management may not apply the Net Proceeds in ways that increase the value of your investment. Various risks and uncertainties, including those set forth in this section, may limit or delay our efforts to use the Net Proceeds in the manner indicated in “*Objects of the Issue*” on page 69.

28. *Other interests of our Directors may cause conflict of interest in the ordinary course of our business.*

Our Directors, Vineet Kumar Saxena and Promila Bhardwaj are also the directors in Fintree Finance Private Limited and Apex Capital and Finance Limited, respectively, both being NBFCs. We cannot assure of any current or potential conflict of interests as a result of such directorship. Also, see, “*Our Management*” on page 122.

29. *Our trademarks are held by our Promoter. If we are unable to protect our intellectual property rights, our business, reputation, results of operations, cash flows and financial condition could be adversely affected.*

The trademark over the corporate logo of our Company and our wholly-owned subsidiary, Capital India Home Loans, is registered in the name of our Promoter, Capital India Corp LLP. Additionally, the applications for registration of trademarks “*Capital India Asset Finance*”, “*Capital India Investment Banking*” and the “*Capital India Wealth Management*”, made by our Promoter have been presently objected to. Further, our Promoter has applied for the registration of trademark “*Capital India – Rediscover Business*”. Though we have obtained no-objection certificates from the Promoter for usage of the aforementioned trademarks, however, there is no specified time period for such usage and our Promoter may at any point of time withdraw its no-objection certificates and may use the trademarks as a part of its own business and operations. Neither our Company, nor Capital India Home Loans have entered into any trademark licensing agreements with our Promoter for the usage of the aforementioned trademarks.

In addition, our Promoter may be unable to obtain, maintain or enforce our intellectual property rights, including for our “*Capital India*” brand, which is fundamental to our business. The registered or unregistered trademarks or trade names that we use may be challenged, infringed, lapsed or determined to be infringing on or dilutive of other marks. Our rights in these trademarks and trade names, which we need in order to build name recognition with potential customers, may not be protected. In addition, third parties may in the future file for registration of trademarks similar or identical to our trademarks. If third parties succeed in registering or developing other legal rights in such trademarks, and if we are not successful in challenging such third-party rights, we may not be able to use these trademarks to commercialize our products in certain geographies or contexts. If we are unable to maintain our name recognition or enforce our trademarks, trade names or other intellectual property, we may not be able to compete effectively and our business, reputation, results of operations, cash flows and financial condition could be adversely affected. For more details, see the section “*Our Business–Intellectual Property*” on page 106.

30. *Our Registered Office, Corporate Office and the office of our subsidiary, Capital India Home Loans Limited are located on leased premises and non-renewal of lease agreements or their renewal on terms unfavorable to us could adversely affect our operations.*

Our Registered Office and Corporate Office are functioning from leased premises, with lease tenures ending on December 10, 2020 and July 31, 2022, respectively. DLF Limited and Raghuleela Builders Private Limited are the lessors/ licensors for our Registered Office and Corporate Office, respectively. Further, the office of our subsidiary, Capital India Home Loans Limited is on a premise leased from Galaxy Builders Private Limited and South Delhi Builders Private Limited, with lease tenure ending on September 15, 2024. The lessors/ licensors are not related parties to our Company and/ our Subsidiaries and we have no other transaction with them. Further, these lease agreements do not have an auto-renewal provision. If any of the owners of these premises terminate or do not renew the lease agreements, or if they seek renewal of such agreements on terms and conditions which may be unfavorable to us, or if they terminate the agreement, we may suffer a disruption in our operations or

substantial rent escalation and relocation costs as a result, or both. Our Company and Capital India Home Loans Limited also faces the risk of being evicted in the event that our lessors allege a breach on our part of the terms of the respective lease agreements. If any of such events were to occur, it may adversely affect our business and results of operations.

- 31. *Our Company has had negative cash flows in the past and may continue to have negative cash flows in the future.***

The following table sets forth our cash flow for the periods indicated:

Particulars	Fiscal ended March 31,			(Amounts in ₹ million)
	2016	2017	2018	Three-month period ended June 30, 2018
Net Cash generated/(used) from Operating Activities	42.50	(388.09)	(39.06)	(65.92)
Net Cash from / (used in) Investing Activity	0.00	28.72	(270.95)	(1240.01)
Net Cash generated/(used) from Financing Activities	(42.97)	893.48	(56.80)	1,238.42

For further details, see “Financial Information” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 144 and 206, respectively. We cannot assure you that our net cash flows will be positive in the future.

- 32. *If our borrowers default in their repayment obligations, our business, results of operations, financial condition and cash flows may be adversely affected.***

Our borrowers may default on their repayment obligations to us on account of several factors, including as a result of their insolvency, competition within their respective sectors, lack of liquidity, time and cost overrun, operational failure, breach of contract, regulatory or judicial intervention and other reasons. In the last five years preceding the date of this Letter of Offer, none of our borrowers have defaulted on their repayment obligations to us, however, if any such defaults were to occur, it could adversely affect our business, financial performance and results of operations.

- 33. *We may not be able to detect money-laundering and other illegal or improper activities fully or on a timely basis, which could expose us to additional liability and harm our business or reputation.***

We are required to comply with applicable anti-money-laundering and anti-terrorism laws and other regulations in India. We, in the course of our operations, run the risk of failing to comply with the prescribed KYC procedures and the consequent risk of fraud and money laundering by dishonest borrowers despite putting in place systems and controls to prevent the occurrence of these risks as is customary in our jurisdiction. In certain of our activities and in our pursuit of business, our financial products and services may be offered to unsuitable customers despite our KYC and AML policies. While we have not experienced any incidences of money laundering or other illegal activities in the past, however if any such incidents were to occur, it may result in regulatory action or requirements to invest further in our relevant systems, either of which could result in increased expenses, or in damage to our reputation which could reduce our attractiveness to investors.

- 34. *We have entered into certain transactions with related parties. There can be no assurance that any such transactions or any future related party transactions will be the most beneficial option for our Company.***

We have entered into a number of related party transactions. While we believe that all such transactions have been conducted on an arm’s length basis and contain commercially reasonable terms, we cannot assure you that we could not have achieved more favorable terms had such transactions been entered into with unrelated parties. We may enter into transactions with related parties in the future as well. Although all related party transactions that we may enter into, will be subject to board or shareholder approval, as necessary under the Companies Act,

2013, and the SEBI Listing Regulations, we cannot assure you that we could not have achieved more favorable terms if such transactions had not been entered into with the related parties.

For details, see *Related Party Transactions* on page 142.

35. *Our ability to pay dividends will depend on our capital requirements, future earnings, cash flows, financial condition, restrictive covenants under our financing arrangement.*

Any future determination as to the declaration and payment of dividends will be decided by our Board and will be subject to the discretion of the Shareholders. It will further depend on factors that our Board and Shareholders consider to be relevant, including our capital requirements, future earnings, cash flows, financial condition and restrictive covenants under our financing arrangements. We cannot provide any assurance that we will be able to pay dividends in the future.

Our Company did not declare any dividend for the Fiscal Years 2014, 2015, 2016 and 2017. For details of our dividend policy, see “*Dividend Policy*” on page 143.

36. *Security breaches of customers’ confidential information that we store may harm our reputation and expose us to liability.*

We store customers’ bank information, credit information and other sensitive data. Any accidental or willful security breaches or other unauthorized access could cause the theft and criminal use of this data. Security breaches or unauthorized access to confidential information could also expose us to liability related to the loss of the information, legal proceedings and negative publicity, which could divert the attention of our management team. While there have been no such incidents in the past, however, if security measures are breached because of third-party action, employee error, malfeasance or otherwise, or if design flaws in our software are exposed and exploited, and, as a result, a third party obtains unauthorized access to customer data, our relationships with customers will be severely damaged, and we could incur significant liability. In addition, we may be required under applicable regulations to notify individuals of data security breaches involving their personal data. Any security breach may cause our customers to lose confidence in the effectiveness of our data security measures. Any security breach, whether actual or perceived, would harm our reputation, and result in lost customers, could in turn have a material adverse effect on our business, prospects, results of operations, financial condition or cash flows.

37. *Any adverse credit ratings in future could increase borrowing costs and adversely affect our access to capital and lending markets and could also affect our interest margins, business, results of operations and financial condition.*

The cost and availability of debt capital depends on our credit ratings. Credit ratings reflect a rating agency’s opinion of our financial strength, operating performance, strategic position, and ability to meet our obligations. Certain factors that influence our credit ratings may be outside of our control. Our long-term fund based proposed borrowing through term loan of ₹ 5,000 million are currently rated as ‘Acuite A-’ by Acuite Ratings & Research Limited (formerly known as SMERA Ratings Limited). However, any adverse credit ratings or downgrading of our present credit ratings in future could increase borrowing costs and adversely affect our access to capital and debt markets, which could in turn adversely affect our interest margins, our business and results of operations and cash flows. In addition, downgrades of our credit ratings could increase the possibility of additional terms and conditions being added to any additional financing or refinancing arrangements in the future.

38. *Our indebtedness and the conditions and restrictions imposed by our financing arrangements could restrict our ability to obtain additional financing, raise capital, conduct our business and operations in the manner we desire.*

As of October 31, 2018, our Company’s outstanding borrowings amounted to ₹ 974.31 million. We will continue to incur additional indebtedness in the future. Some of the financing arrangements entered into by us include conditions and covenants that require our Company to obtain lender’s consents prior to carrying out certain

activities and entering into certain transactions, including amending constitutional documents, changing our current ownership / control, formulating a scheme of amalgamation, and declaration of dividend, for which we have to obtain consent from lenders. We are also required to maintain certain financial ratios and ensure compliance with regulatory requirements. A failure to observe the covenants under our financing arrangements or failure to obtain necessary waivers may lead to the termination of our credit facilities, acceleration of amounts due under such facilities, trigger cross-default provisions and the enforcement of security provided. There can be no assurance that we will be able to persuade our lenders to grant extensions or refrain from exercising such rights which may adversely affect our operations and cash flows. As a result, we may have to dedicate a substantial portion of our cash flow from operations to make payments under such financing documents, thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. Additionally, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing or generate sufficient cash to fund our liquidity requirements.

For further details on the terms of our borrowings, see “*Financial Indebtedness*” on page 224.

39. *Insurance coverage and policies obtained by us may not adequately protect us against economic losses arising from any or all hazards, which may adversely affect our business, results of operations, financial condition and cash flow.*

We maintain insurance coverage in accordance with industry standard and practice that we believe is adequate for our operations. We maintain directors’ and officer’s insurance policy, group health policy, group personal accident policy, fire and other special perils policy. However, there can be no assurance that the terms of our insurance policies will be adequate to cover any or all damages or losses suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. To the extent that we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our business, financial condition and results of operations could be adversely affected.

For further details on our insurance coverage, see “*Our Business - Insurance*” on page 106.

40. *Our Subsidiaries may not pay dividends on shares that we hold in them or may not contribute adequate revenue on a consolidated basis, year on year. Consequently, our Company may not receive any return on investments in our Subsidiaries.*

As on the date of this Letter of Offer, our Subsidiaries are yet to commence their business activities. Further, our Subsidiaries have no obligation to pay dividends and may be restricted from doing so by law or contract, including applicable laws, charter provisions and the terms of their respective financing arrangements. We cannot assure you that our Subsidiaries will generate sufficient profits and cash flows, or otherwise be able to pay dividends to us in the future. Additionally, our Subsidiaries may not contribute adequate revenue on a consolidated basis, year on year, owing to various internal and external factors, which may consequently affect our results of operations and financial condition.

External Risk Factors

41. *A slowdown in economic growth in the markets in which we operate could adversely affect our business and operations.*

Our performance and growth are dependent on the health of the economy of the markets in which we operate. Various factors may lead to a slowdown in the Indian or world economy, which in turn may adversely impact our business, prospects, financial performance and operations. In the past, the Indian economy has been affected by global economic uncertainties, liquidity crisis, domestic policies, global political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, volatility in inflation rates and various other factors. Accordingly, high rates of inflation in India could increase our employee costs and decrease our operating margins, which could have an adverse effect on our results of operations. Any slowdown in the economy of the markets in which we operate may adversely affect our business and financial performance of our business and operation.

42. *Civil disturbances, terrorist attacks, extremities of weather, regional conflict, political instability and other unforeseen events may have adverse effects on our operations and financial performance.*

Any significant event such as earthquake, fire, floods and similar natural calamities or man-made disasters, civil unrest or terrorist attacks, may cause interruption in our business and operations. The market price and liquidity of our Equity Shares may be affected by changes in laws, regulations and policies implemented by the central, state or local bodies. Other social, ethnic, economic or political disturbances or communal tensions could also have a materially adverse impact on our businesses and financial performance.

43. *Enforcement of foreign judgments against our Company or our management may not be possible or may require additional legal proceedings.*

Our Company is a limited liability company incorporated under the laws of India and all our Directors and executive officers are residents of India. A substantial portion of our assets and the assets of the Directors and the executive officers of our Company, who are Indian residents, are located in India. As a result, it may be difficult for the investors to affect service of process upon our Company or such persons outside India or to enforce judgments obtained in courts outside India.

India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, which includes the United Kingdom, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements of the Code of Civil Procedure, 1908 (the “**Civil Code**”). Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be executed in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgment in such a jurisdiction against the Company or its officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. However, the party in whose favour such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in a non-reciprocating territory within three years of obtaining such final judgment in the same manner as any other suit filed to enforce a civil liability in India. If, and to the extent that, an Indian court were of the opinion that fairness and good faith so required, it would, under current practice, give binding effect to the final judgment that had been rendered in the non-reciprocating territory, unless such a judgment contravenes principles of public policy in India. It is unlikely that an Indian court would award damages on the same basis or to the same extent as was awarded in a final judgment rendered by a court in another jurisdiction if the Indian court believed that the amount of damages awarded was excessive or inconsistent with Indian practice. In addition, any person seeking to enforce a foreign judgment in India is required to obtain prior approval of the RBI to repatriate any amount recovered pursuant to the execution of such a judgement.

44. *Any downgrading of India’s debt rating by a domestic or international rating agency could adversely affect our business.*

There could be a downgrade of India’s sovereign debt rating due to various factors, including changes in tax or fiscal policy, or a decline in India’s foreign exchange reserves, which are outside our control. Any adverse revisions to India’s credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. Although economic conditions are different in each country, investors’ reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India, which may cause fluctuations in the prices of our Equity Shares. This could have an adverse effect on our business and financial performance, and ability to obtain financing for expenditures.

45. *Financial instability, economic developments and volatility in securities markets may cause the price of the Equity Shares to decline.*

The volatility in, and actual or perceived trends in trading activity on, India’s principal stock exchanges may have negative impact on the market conditions in which our Equity Shares trade. Indian stock exchanges have in the

past experienced substantial fluctuations in the prices of listed securities. These exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of the various Indian stock exchanges have from time-to-time imposed restrictions on trading in certain securities, limitations on price movements and constraints on the margin requirements. Previously, disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which may have negatively impacted the market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected.

Risks relating to the Issue and the Equity Shares

46. We will not distribute this Letter of Offer, the Abridged Letter of Offer and CAF to overseas Shareholders who have not provided an address in India for service of documents.

We will dispatch this Letter of Offer, the Abridged Letter of Offer and CAF (the “**Issue Materials**”) to the shareholders who have provided an address in India for service of documents. The Issue Materials will not be distributed to addresses outside India on account of restrictions that apply to circulation of such materials in overseas jurisdictions. However, the Companies Act, 2013 requires companies to serve documents at any address which may be provided by the members as well as through e-mail. Presently, there is lack of clarity under the Companies Act, 2013 and the rules made thereunder with respect to distribution of Issue Materials in overseas jurisdictions where such distribution may be prohibited under the applicable laws of such jurisdictions. While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act, 2013 and may subject us to fines or penalties.

47. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares are generally taxable in India. The Union Budget presented in the Indian Parliament on February 1, 2018, introduced a number of amendments to the existing direct and indirect tax regime, such as the withdrawal of long term capital gains exemptions on equity shares, among others. Prospective investors should consult their own tax advisors in relation to the consequences of investing in the Equity Shares.

48. Any future issuance of the Equity Shares, or convertible securities or other equity linked securities by our Company may dilute your future shareholding and sales of the Equity Shares by the Promoter or Promoter Group or other major shareholders of our Company may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, or convertible securities or other equity linked securities by our Company, may lead to dilution of your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. Any future sales of the Equity Shares by the Promoter or other major shareholders of our Company may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

49. You may not receive the Equity Shares that you subscribe in the Issue until 15 days after the date on which this Issue closes, which will subject you to market risk.

The Equity Shares that you may be Allotted in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

50. There is no guarantee that the Equity Shares will be listed on the BSE in a timely manner, or at all, and any trading closures at the BSE may adversely affect the trading price of our Equity Shares.

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the BSE until after those Equity Shares have been issued and Allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future.

Secondary market trading in our Equity Shares may be halted by a stock exchange because of market conditions or other reasons. Additionally, an exchange or market may also close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at a particular point in time.

1. Global Financial Markets

Although markets remained relatively calm and stable during most part of 2017 and January 2018 even in the wake of the unwinding of the Fed’s balance sheet, financial markets turned volatile in February and went into swift correction on fears of faster rate hikes by the US Fed. Early March also witnessed the return of volatility on announcement of protectionist measures by the US and the momentary calm was shattered by intensification of trade protectionism between China and the US. The growing financial market integration in recent years has led to spillovers of volatility from advanced economies (“AEs”) to emerging market economies (“EMEs”) due to monetary policy actions and financial events, as witnessed recently.

Global economic activity has been witnessing a broad-based cyclical upturn. The acceleration in global trade outpacing global growth is a welcome development. Inflation remains below policy target levels in many key economies despite rise in some commodity prices and improving demand outlook, while monetary policy stances remain diverse. The recent volatility in financial markets stemming mainly from the uncertainty over the pace of normalization of monetary policy in AEs could pose a challenge to the EMEs, while fears of rising trade protectionism have clouded the global trade outlook.

2. Indian Economy – Overview & Trends

The Central Statistics Office (“CSO”) released its second advance estimates for 2017-18 in February 2018, revising India’s real gross domestic product (“GDP”) growth marginally upward to 6.6% from 6.5% in the first advance estimates released in January 2018. GDP growth in 2017-18 at 6.6% was lower than 7.1% in 2016-17 and the deceleration was broad-based, but each component revealed intra-year turning points. Private consumption growth – whose contribution to GDP growth in 2017-18 was 68% – moderated in the second half. GST implementation had an adverse, even if transient, effect on urban consumption through loss of output and employment in the labor-intensive unorganized sector. Government expenditure provided sustained support to aggregate demand, with a pick-up in pace in the second half. The projected CPI inflation for 2018-19 is revised to 4.7-5.1% in H1:2018-19 and 4.4% in H2, including the house rent allowance (“HRA”) impact for central government employees, with risks tilted to the upside, as illustrated below. Excluding the impact of HRA revisions, CPI inflation is projected at 4.4-4.7 % in H1:2018-19 and 4.4 % in H2.

Headline CPI inflation reached a peak of 5.2% in December 2017 (4.9%, excluding the estimated impact of HRA for central government employees), reflecting an unseasonal spike in the prices of vegetables and the full impact of the

central government implementing the 7th Central Pay Commission's ("CPC's") HRA award. For 2019-20, assuming a normal monsoon and no major exogenous/policy shocks, structural model estimates indicate that inflation will move in a range of 4.5-4.6%. The 50% and the 70% confidence intervals for Q4:2019-20 are 3.0-6.1% and 2.2-7.0%, respectively.

a. GDP Growth

Going forward, economic activity is expected to gather pace in 2018-19, benefitting from a conducive domestic and global environment. In the March 2018 round of the RBI's survey, professional forecasters expected real GDP growth to pick up marginally from 7.2% in Q3:2017-18 to 7.3% in Q1:2018-19 and remain at 7.2% Q2-Q4. Taking into account the baseline assumptions, survey indicators and model forecasts, real GDP growth is projected to improve from 6.6% in 2017-18 to 7.4% in 2018-19 – 7.3% in Q1, 7.4% in Q2, 7.3% in Q3 and 7.6% in Q4 – with risks evenly balanced around this baseline path. For 2019-20, the structural model estimates indicate real GDP growth at 7.7%, with quarterly growth rates in the range of 7.4-7.9%, assuming a normal monsoon, and no major exogenous/policy shocks.

b. Fiscal and current deficit:

The Central Government's fiscal deficit for 2017-18 and 2018-19 is likely to be above initial expectations and the medium-term adjustment path has also been postponed. An empirical assessment presented in the - Monetary Policy Report ("MPR") of October 2017 suggests that: (a) in India, causality runs from fiscal deficits to inflation; and (b) the impact of fiscal deficits on inflation is non-linear, i.e., higher the initial levels of the fiscal deficit and inflation, higher is the impact of an increase in the fiscal deficit on inflation. Given the present levels of the combined (centre and states) fiscal deficit, an increase in the fiscal deficit to GDP ratio by 100 bps could lead to an increase of about 50 bps in inflation. Apart from its direct impact on inflation, fiscal slippage has broader macro-financial implications, notably on economy-wide costs of borrowing which have already started to rise. These may feed into inflation and elevate it further.

c. Interest rate trajectory:

Since December 2017 and January 2018, respectively, deposit and lending rates have begun to inch up in line with interest rates in other financial market segments. With the transition of system-level liquidity from surplus towards neutrality, banks have started raising their interest rates in a sequence beginning with bulk term deposit rates, retail term deposit rates and on to marginal cost of funds based lending rate ("MCLR's").

3. NBFC Sector Overview

The RBI regulates and supervises three categories of NBFIs, viz. All-India financial institutions ("AIFIs"), primary dealers ("PDs") and NBFCs. As an NBFC, they can be classified into deposit taking and non-deposit NBFCs. The non-deposit NBFCs can be further classified as 'Systemically –Important NBFCs-ND' and other NBFCs-ND. NBFCs-ND-SI have become significantly larger than NBFCs-D – their share in total assets of the two categories taken together was about 86 % in 2017. NBFCs were brought under the regulation of the Reserve Bank in 1964 by inserting Chapter III B in the RBI Act. In more recent years, regulatory measures have been motivated by the objectives of financial stability, financial inclusion and harnessing of specialized domain expertise.

Based on the activities undertaken, NBFCs can be classified into 12 major categories:

i. Asset Finance Company

- ii. Loan Company
- iii. Investment Company
- iv. Infrastructure Finance Company
- v. Systemically Important Core Investment Company
- vi. Infrastructure Debt Fund
- vii. Micro Finance Institution
- viii. NBFC Factor
- ix. NBFC Non-Operative Financial Holding Company
- x. Mortgage Guarantee Company
- xi. Account Aggregator
- xii. Non-banking Financial Company – Peer to Peer Lending Platform

NBFCs-ND-SI have traditionally funded both the industrial sector and the retail segment. Several NBFCs-ND-SI specialize in financing niche segments, including the micro and small enterprises, which particularly figure prominently in the loan portfolios of NBFCs-MFI and loan companies. Over recent years, there has been a steady growth in the credit to MSE sector from these two categories. This was mainly on account of the revision in December 2015 in the returns filed by NBFCs. The number of NBFCs-ND-SI increased till 2014 due to increased licenses given to these entities following notification of newer categories. Thereafter, there was a decline in their number mainly reflecting the increase in threshold asset size for defining NBFCs-ND-SI. The number of NBFCs has declined because of the regulatory initiatives aimed at protecting depositors' interests and safeguarding financial stability. Nevertheless, the overall balance sheet size of NBFCs has expanded with their credit growth recording a higher reading in 2016-17 when bank credit witnessed historically low growth.

NBFCs act as a critical cog in the credit system of the economy, by providing financial services with respect to products as well as customer and geographic segments at the grassroots level. As of March 2017, they accounted for 16% of the overall systemic credit. The outstanding loans disbursed by NBFCs grew at a 19% CAGR since the fiscal year 2011-2012. The growth is distributed in various sectors. Unlike banks, NBFCs cannot accept demand deposits, do not form part of the payment and settlement system and cannot issue cheques drawn on itself and cannot offer deposit insurance facility of Deposit Insurance and Credit Guarantee.

4. Indian wholesale lending industry overview

Wholesale finance includes the lending services to medium-to-large-sized corporates, institutional customers, real estate developers by banks and other financial institutions. The ticket size of loans disbursed vary from ₹ 500 million to ₹ 5000 million, with some NBFCs taking collateral cover as high as three times depending on the structure of the loan. Wholesale finance NBFCs offer funding which is industry-specific (such as real estate finance), structured and customized as per the needs of the borrower and suits the risk appetite of the respective NBFC. Real estate financing accounts for majority share in overall wholesale credit, for the fiscal 2017, compared with structured credit and capital market lending. While most NBFCs have limited exposure in long-term funding, banks extend both long and short-term funding to diverse sectors. They also have a higher market share in wholesale lending *vis-à-vis* NBFCs.

The AUM of wholesale financing NBFCs (excluding HFCs) has grown at a robust CAGR of 31% between 2012-2017, to touch a market share of ₹1.3 trillion by March 2017. Despite a poor growth demonstrated by the banks in this segment, NBFCs have been able to expand their market share to 9% from 5% during between fiscals 2012 and 2017, where the wholesale loans outstanding of NBFCs and HFCs together also grew at a CAGR of 23%. The strong growth of NBFCs in the wholesale financing can be explained by couple of reasons: customized solutions, with features such as interest moratorium and bullet repayment schedules, which are not offered by banks; lower turnaround time, whereby the NBFCs usually disburse a large-ticket loan to a new customer within 45-60 days; slower decision-making

processes in public sector banks, owing to their to their risk aversion and fragile capital position; and strong client relationships of NBFCs due to their presence in allied businesses, or because they are supported by well-established parent companies.

On the other hand, introduction of RERA, has caused a sense of concern and uncertainty in the markets. This sentiment is likely to persist till the market adjusts itself to RERA and is able to implement it effectively. RERA is eventually expected to instill more confidence in the market, particularly in financial institutions while lending funds to builders and developers on account of having established a regulatory authority and laying down stringent compliances. Despite these concerns, it is expected that the wholesale financing by NBFCs will grow at 23-26% CAGR to capture a market size of ₹ 2.0 trillion by end of fiscal year 2018-19.

5. Housing Finance Industry Overview

For the NBFCs, housing finance occupies the second largest portfolio after infrastructure. The Indian housing finance market has grown rapidly, with mortgage lending significantly contributing to growth in construction and demand for housing. The National Housing Bank (“NHB”) was set up in 1988 as the apex institution for regulating and controlling housing finance companies in the country. Over the years, through its innovative measures, active guidance and appropriate regulatory interventions, NHB has significantly facilitated broadening and deepening of the housing finance market in the country.

The financial crisis of 2007-08 had a long lasting effect on the housing situation in different countries, which was evidenced by a downward trend in the housing prices all over the world. As per the IMF Global Watch Report, India was classified as a “boom” economy, thus presenting itself as an opportunity for the housing finance market. The CAGR of HFCs is approximately 22% in loan outstanding between 2011-12 and 2016-17. Both banks and HFCs offer mortgage backed loans, with the banks having a 60% share in the loan assets as of 2016-17. The share of HFCs has increased rapidly to 40% from 34% over the last couple of years, largely supported by their sharper focus on loan against property and developer loan segment. Due to HFCs strong origination skills, focused approach of catering to a particular category of customers, relatively superior customer service and diverse channels of business sourcing placed in the backdrop of increased urbanisation, the growth is expected to accelerate leading to a 18-20% CAGR over next five fiscal years.

HFCs can be categorised as large, medium and small size HFCs. Mid-size HFCs comprise of those HFCs with total retail housing loan outstanding of below ₹ 300 billion, as of March 2017. It is expected that with the focus of the mid-size HFC on affordable-housing projects and their relatively higher concentration in Tier-II and smaller cities, they will continue to grow. Higher transparency in the sector, increasing urbanisation and government’s incentive coupled with an increased financial penetration in urban areas are primary growth drivers for the housing finance market for the next couple of years. Demand for loans for new housing is one of the primary drivers in the HFC disbursements. The Government has also taken key initiatives for improving the housing stock, such as simplification of foreign investment through automatic route, allowance of investment in real estate sector through REITs, and enabling affordable housing by facilitating availability of long term funds for developers and NHB.

Our Strengths

We believe the following are our principal strengths:

Experienced, highly motivated and dedicated management team

We have an experienced, highly motivated and dedicated senior management team, with significant experience in the banking, financial services, consultancy and infrastructure sectors. Pursuant to the change in control in November 2017, we appointed Keshav Porwal and Amit Sahai Kulshreshtha, as our Managing Director and Executive Director & CEO, respectively, and Vineet Kumar Saxena, as CEO of Capital India Home Loans in December 2017. Keshav Porwal, our Managing Director has approximately two decades of experience in the financing and real estate industry. Amit Sahai Kulshreshtha, our Executive Director and CEO has prior experience in investment banking, consulting and infrastructure sectors. Vineet Kumar Saxena, CEO of Capital India Home Loans, our wholly-owned subsidiary, has prior experience in the financial services sector, having been associated with Barclays Bank PLC, ICICI Personal Financial Services Limited and ICICI Bank Limited, among others. Our new and dynamic senior management team has already implemented a number of changes in the Company for steady growth of the business. One of the changes was to diversify from real estate lending focus to become sector agnostic and lend with a focus on good quality collateral asset. As a result, our real estate lending, in the Fiscal Year 2018 and the three-month period ended June 30, 2018, has come down to 37.0% and 27.4% respectively compared to 70.0% of our lending portfolio in the Fiscal Year 2017. Further, we believe that our dedicated senior management team has enabled us to attract experienced mid-level talented, growth-oriented professionals.

Institutional philosophy of prudent risk management controls through asset-backed lending and streamlined procedures

We maintain healthy and high-quality loan asset portfolio in synchronization with our institutional philosophy of lending against security, which we call asset backed lending. We have instituted prudent and comprehensive risk management controls, policies, and procedures that are critical for the long-term sustainable development of our organization. Our risk management committee which is a Board level committee oversees and monitors the overall credit risk management framework. Our credit risk governance framework comprises of primarily three-units, spanning across the (i) our business teams, that generates lead; (ii) the credit risk unit, that independently manages the risk, provides policy guidance, performs credit analysis, risk reporting and credit monitoring, and our credit risk unit comprises of various sub-units, such as credit underwriting and policy unit and portfolio monitoring unit, which are responsible for management of credit risks; and (iii) the internal audit unit, which independently assesses the design and operational effectiveness of the entire credit risk management framework. Our credit risk governance framework incorporates the requirement of senior management and credit committee approval, with built-in escalation matrices at pre-defined credit thresholds, which enables us to ensure that high-ticket advances are sanctioned by our senior management.

We have implemented enterprise-wide loan management system, *OmniFin*, which provides single platform operational support such as risk management, documentation management and customer service and consequently aids our decision-making. We are also integrating *OmniFin* with services of third-party credit assessment service products, such as *Perfios - Insight* to increase the operational efficiency of loan disbursement and risk assessment processes. We believe that our streamlined credit risk governance framework and loan management system have contributed to our operational efficiency and enhances our ability to take prudent credit decisions.

As a result of our prudent risk management controls, our Company had no NPAs in the last three Fiscal Years and the three-month period ended June 30, 2018. Further, as of March 31, 2016, March 31, 2017, March 31, 2018 and June 30, 2018, Nil, 89.71 % (i.e., ₹ 785.00 million), 89.42 % (i.e., ₹ 929.43 million) and 88.79 % (i.e., ₹ 871.03 million), respectively, of our loans and advances relating to financing activity were secured.

Our Strategies

Following the change in control of our Company in November 2017, our Board has implemented initiatives to rejuvenate our institutional spirit. Some of the initiatives implemented by the new management include: (i) induction of the new senior management team having significant experience and a diversified track record in the banking, financial services, consultancy and infrastructure sectors; (ii) raise of capital through a preferential allotment in June 2018, wherein funds aggregating to approximately ₹ 2,500 million were mobilized for the business, operational and general corporate requirements of our Company; (iii) diversification from real estate lending focus to become sector agnostic lender; (iv) augmentation of the risk management controls; and (v) adoption of enterprise-wide loan management system, *OmniFin*, to increase the operational efficiency. While we intend to continue evaluating and implementing changes to enhance our scale of operations and increase our profitability, we intend to focus on:

Further strengthening credit assessment and risk management procedures: In line with our institutional philosophy of implementing prudent risk management controls, we continuously endeavor to strengthen various aspects of our credit and risk management, including credit assessment and due diligence procedures for appraisal of the borrower's credit worthiness and mitigation of the credit risk. We are committed to efficiently maintain healthy and high-quality loan asset portfolio.

In relation to origination and appraisal of our advances, we propose to continuously review and upgrade our credit risk governance framework, including enhancing our resources. In addition, we are currently in the process of integrating our loan management system, *OmniFin* with services of third-party credit assessment service products, such as *Perfios - Insight*, which we believe would increase the operational efficiency of loan disbursement and risk assessment processes. For details, see “*Our Business – Risk Management Architecture*” and “*Our Business – Information Technology*” on pages 103 and 106, respectively.

Leverage on the relationship and experience of our senior management for business growth: We intend to continue growth at a stable but steady pace. Therefore, instead of focusing on opening of new branches, we wish to leverage the experience and business relationships of our senior management to grow our business. Our new senior management has a diversified track record that can help us identify suitable customers across industries which meet our risk appetite. We also believe our senior management's acumen of the market trends, demands and industry developments, would enable us to adapt and take advantage of market opportunities.

Our Company is an NBFC, which has been managed by our new management team from November 27, 2017. Our present Promoter, Capital India Corp LLP, completed the acquisition of Equity Shares, from our erstwhile promoter and through an open offer from our public shareholders, in December 2017. The new management plans to grow the business of the Company and hence, proposed to raise sufficient equity funds to meet its business and operations requirements.

It is imperative that our Company raise equity funds to bolster its net worth significantly before any further financial indebtedness could be raised. In addition to the regulatory compliances in terms of the directions and guidelines issued by the RBI, a substantial equity fund raise of the size proposed *vide* the current Issue will enable the Company to raise debt from banks and financing institutions at competitive rates, which will enable the Company to compete with other lenders and competitors in the market, thus enabling the Company to pursue its objective of growing its lending business in a more effective way.

As per the extant RBI regulations, for an NBFC to be categorized as systemically important non-deposit taking non-banking finance company, it needs to have an asset size of ₹ 5,000 million and above. With the proposed Issue, the Company will be able to meet this requirement and will be categorized as systemically important non-deposit taking non-banking finance company. Being a systemically important non-deposit taking non-banking finance company allows a non-banking finance company to be entitled to take the benefit of the Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002, which is a very effective and efficient regulatory and security enforcement mechanism for any lending institution in India, and will enormously assist our Company to keep its non-performing assets / delinquent assets under check.

[#] Assuming full subscription in the Issue.

After deducting the Issue related expenses, we estimate the proceeds of the Issue to be ₹ 2,456.91 million (“**Net Proceeds**”).

Our Company proposes to utilise the Net Proceeds towards (i) augmenting its capital base to meet future capital requirements, and (ii) general corporate purposes.

The main objects and objects incidental and ancillary to the main objects set out in the Memorandum of Association enable our Company to undertake its existing activities and the activities for which funds are being raised through the Issue.

Proposed schedule of implementation and deployment of the Net Proceeds

The Net Proceeds are currently expected to be deployed in Fiscal Year 2019.

We may have to revise our funding requirements and deployment on account of a variety of factors such as our financial condition, business and strategy and external factors such as market conditions and competitive environment, which may not be within the control of our management. This may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular purpose at the discretion of our management.

In case of a shortfall in raising requisite capital from the Net Proceeds towards meeting the objects of the Issue, we may explore a range of options including utilising internal accruals and availing additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls.

The total expenses of the Issue are estimated to be approximately ₹ 30.59 million. The Issue related expenses include fees payable to the Lead Manager and legal counsel, fees payable to the auditors, fees payable to the Registrar to the Issue, printing and distribution expenses, advertising and marketing expenses and all other incidental and miscellaneous expenses for listing the Rights Equity Shares on the Stock Exchange.

Means of Finance

The entire requirement of funds towards objects of the Issue is proposed to be met from the Net Proceeds. Accordingly, we confirm that there is no requirement for us to make firm arrangements of finance through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised from the Issue.

Interim Use of Net Proceeds

Pending utilization for the purposes described above, we intend to deposit the Net Proceeds only in scheduled commercial banks included in the Second Schedule of the Reserve Bank of India Act, 1934, as may be approved by our Board or the Securities Issuance Committee. In accordance with Section 27 of the Companies Act, 2013, we confirm that we shall not use the Net Proceeds (or any part thereof) for buying, trading or otherwise dealing in any shares of any listed company or for any investment in equity markets.

Monitoring of Utilization of Funds

Other Confirmations

No part of the Net Proceeds will be paid by our Company as consideration to our Promoter, Directors, Key Management Personnel or Group Company.

Reasons for Rights Issue

Our Company is an NBFC, which has been managed by our new management team from November 27, 2017. Our present Promoter, Capital India Corp LLP, completed the acquisition of Equity Shares from our erstwhile promoter and through an open offer from the public Shareholders, in December 2017. The new management plans to grow the business of the company in furtherance of the objectives of the Company and hence, propose to raise sufficient equity funds to meet its funding requirements. The management found equity fund raising through a rights issue to the

existing Shareholders of the Company to be most suitable as it provides equal opportunity to all existing Shareholders of the Company to participate in the growth plan of the Company, if they so desire.

Additionally, the Company also considered and raised funds through a preferential allotment dated June 8, 2018. For details of the preferential allotment, see “– Notes to Capital Structure – Share Capital History” on page 57.

The other options for raising capital that were considered and evaluated by the Company are as under:

Public offering of Equity Shares: Considering the current scale of business, operations and profitability, it was not considered appropriate to pursue a large public offering of Equity Shares as it would have been difficult to attract investors.

Qualified institutional placement: Qualified institutional placement was also evaluated but not pursued as it was considered difficult that QIBs could be attracted to invest in such an offering as the past track record and current scale of business operation and profitability of the Company is not large enough.

1. Global Financial Markets

Although markets remained relatively calm and stable during most part of 2017 and January 2018 even in the wake of the unwinding of the Fed’s balance sheet, financial markets turned volatile in February and went into swift correction on fears of faster rate hikes by the US Fed. Early March also witnessed the return of volatility on announcement of protectionist measures by the US and the momentary calm was shattered by intensification of trade protectionism between China and the US. The growing financial market integration in recent years has led to spillovers of volatility from advanced economies (“AEs”) to emerging market economies (“EMEs”) due to monetary policy actions and financial events, as witnessed recently.

Global economic activity has been witnessing a broad-based cyclical upturn. The acceleration in global trade outpacing global growth is a welcome development. Inflation remains below policy target levels in many key economies despite rise in some commodity prices and improving demand outlook, while monetary policy stances remain diverse. The recent volatility in financial markets stemming mainly from the uncertainty over the pace of normalization of monetary policy in AEs could pose a challenge to the EMEs, while fears of rising trade protectionism have clouded the global trade outlook.

2. Indian Economy – Overview & Trends

The Central Statistics Office (“CSO”) released its second advance estimates for 2017-18 in February 2018, revising India’s real gross domestic product (“GDP”) growth marginally upward to 6.6% from 6.5% in the first advance estimates released in January 2018. GDP growth in 2017-18 at 6.6% was lower than 7.1% in 2016-17 and the deceleration was broad-based, but each component revealed intra-year turning points. Private consumption growth – whose contribution to GDP growth in 2017-18 was 68% – moderated in the second half. GST implementation had an adverse, even if transient, effect on urban consumption through loss of output and employment in the labor-intensive unorganized sector. Government expenditure provided sustained support to aggregate demand, with a pick-up in pace in the second half. Gross fixed capital formation turned around in Q2 and accelerated in the second half – markedly so in Q3 – reflecting the first signs of a sustained expansion in capital goods production and a modest revival of construction activity. Net exports dragged down aggregate demand in 2017-18 due to a surge in imports and deceleration in exports in Q3, the latter being driven in part by GST-related working capital disruptions. The projected consumer price index (“CPI”) inflation for 2018-19 is revised to 4.7-5.1% in H1:2018-19 and 4.4% in H2, including the house rent allowance (“HRA”) impact for

central government employees, with risks tilted to the upside, as illustrated below. Excluding the impact of HRA revisions, CPI inflation is projected at 4.4-4.7 % in H1:2018-19 and 4.4 % in H2.

Headline CPI inflation reached a peak of 5.2% in December 2017 (4.9%, excluding the estimated impact of HRA for central government employees), reflecting an unseasonal spike in the prices of vegetables and the full impact of the central government implementing the 7th Central Pay Commission’s (“CPC’s”) HRA award. The delayed setting in of the seasonal food prices moderation took down headline inflation to 4.4% in February (4.1%, excluding the estimated impact of HRA for central government employees). It is likely that this softening will keep the reading for March benign before it reverses in April. The incidence and strength of this reversal will condition monetary policy responses in 2018-19.

For 2019-20, assuming a normal monsoon and no major exogenous/policy shocks, structural model estimates indicate that inflation will move in a range of 4.5-4.6%. The 50% and the 70% confidence intervals for Q4:2019-20 are 3.0-6.1% and 2.2-7.0%, respectively.

a) GDP Growth:

Going forward, economic activity is expected to gather pace in 2018-19, benefitting from a conducive domestic and global environment. First, the teething troubles relating to implementation of the GST are receding. Second, credit off-take has improved in the recent period and is becoming increasingly broad-based, which portends well for the manufacturing sector and new investment activity. Third, large resource mobilization from the primary market could strengthen investment activity further in the period ahead. Fourth, the process of recapitalization of public sector banks and resolution of distressed assets under the Insolvency and Bankruptcy Code (“IBC”) may improve the business and investment environment. Fifth, global trade growth has accelerated, which should encourage exports and reduce the drag from net exports. Sixth, the thrust on rural and infrastructure sectors in the Union Budget could rejuvenate rural demand and also crowd in private investment.

In the March 2018 round of the RBI’s survey, professional forecasters expected real GDP growth to pick up marginally from 7.2% in Q3:2017-18 to 7.3% in Q1:2018-19 and remain at 7.2% Q2-Q4.

Taking into account the baseline assumptions, survey indicators and model forecasts, real GDP growth is projected to improve from 6.6% in 2017-18 to 7.4% in 2018-19 – 7.3% in Q1, 7.4% in Q2, 7.3% in Q3 and 7.6% in Q4 – with risks evenly balanced around this baseline path. For 2019-20, the structural model estimates indicate real GDP growth at 7.7%, with quarterly growth rates in the range of 7.4-7.9%, assuming a normal monsoon, and no major exogenous/policy shocks.

b) Fiscal and current deficit:

The Central Government’s fiscal deficit for 2017-18 and 2018-19 is likely to be above initial expectations and the medium-term adjustment path has also been postponed. An empirical assessment presented in the - Monetary Policy Report (“MPR”) of October 2017 suggests that: (a) in India, causality runs from fiscal deficits to inflation; and (b) the impact of fiscal deficits on inflation is non-linear, i.e., higher the initial levels of the fiscal deficit and inflation, higher is the impact of an increase in the fiscal deficit on inflation. Given the present levels of the combined (centre and states) fiscal deficit, an increase in the fiscal deficit to GDP ratio by 100 bps could lead to an increase of about 50 bps in inflation. Apart from its direct impact on inflation, fiscal slippage has broader macro-financial implications, notably on economy-wide costs of borrowing which have already started to rise. These may feed into inflation and elevate it further. (Source: <https://m.rbi.org.in/Scripts/PublicationsView.aspx?id=18110#I2>)

c) Interest rate trajectory:

Since December 2017 and January 2018, respectively, deposit and lending rates have begun to inch up in line with interest rates in other financial market segments. With the transition of system-level liquidity from surplus towards neutrality, banks have started raising their interest rates in a sequence beginning with bulk term deposit rates, retail term deposit rates and on to marginal cost of funds based lending rate (“MCLR”).

One of the factors that impedes transmission is the higher interest rates on small saving instruments. On March 28, 2018, the GoI decided to keep the interest rates on small savings unchanged for Q1:2018-19 from those notified for Q4:2017-18. As a result, interest rates on some small savings schemes are now, for the first time, lower than those prescribed under the formula for fixing small saving interest rates and are better aligned with term deposit interest rates of banks.

3. NBFC sector overview

a) Structure, classification, evolution:

The RBI regulates and supervises three categories of NBFIs, viz. All-India financial institutions (“AIFIs”), primary dealers (“PDs”) and NBFCs.

(Source: https://m.rbi.org.in/Scripts/BS_ViewBulletin.aspx?Id=17147)

Non-banking Financial Institutions regulated by RBI

The number of NBFCs-ND-SI increased till 2014 due to increased licenses given to these entities following notification of newer categories. Thereafter, there was a decline in their number mainly reflecting the increase in threshold asset size for defining NBFCs-ND-SI. NBFCs-ND-SI have become significantly larger than NBFCs-D – their share in total assets of the two categories taken together was about 86 % in 2017.

Based on activities undertaken, NBFCs are classified into 12 major categories as follows:

Classification of NBFCs based on activities undertaken	
Types of NBFCs	Activity
1. Asset Finance Company	Financing of physical supporting productive/economic activity, including automobiles, tractors and generators
2. Loan Company	Providing finance by extending loans or otherwise for any activity other than its own but does not include an AFC
3. Investment Company	Acquiring securities for the purposes of selling
4. Infrastructure Finance Company (NBFC-IFC)	Providing infrastructure loans
5. Systemically Important Core Investment Company (CIC-ND-SI)	Acquiring shares and securities for investment in mainly equity shares
6. Infrastructure Debt Fund (NBFC-IDF)	For facilitating flow of long-term debt into infrastructure projects
7. Micro Finance Institution (NBFC-MFI)	Extending credit to economically disadvantaged groups as well as support Micro, Small and Medium Enterprises.
8. Factor (NBFC-Factor)	Undertaking the business of acquiring receivables of an assignor or extending loans against security interest of receivables at a discount.
9. NBFC Non-Operative Financial Holding Company (NOFHC)	For permitting promoter/promoter groups to set up a new bank.
10. Mortgage Guarantee Company (MGC)	Undertaking mortgage activities
11. Account Aggregator (NBFC-AA)	Collecting and providing the information of customers' financial assets in a consolidated, organized and retrievable manner to the customer or others as specified by the customer.
12. Non-banking Financial Company – Peer to Peer Lending Platform (NBFC-P2P)	Providing an online platform to bring lenders and borrowers together to help mobilize unsecured finance

NBFCs were brought under the regulation of the RBI in 1964 by inserting Chapter III B in the RBI Act. In more recent years, regulatory measures have been motivated by the objectives of financial stability, financial inclusion and harnessing of specialized domain expertise.

One of the key regulatory initiatives by the RBI to improve the role of NBFCs in financial inclusion was the creation of NBFCs-MFI in 2011, following the recommendations by the Sub-Committee of the Central Board of the Reserve Bank (Chairman: Shri Y. H. Malegam). In 2015, guidelines for this segment were revised, including the enhancement of the annual income limit for availing microfinance loans, increasing the limit of total indebtedness of the borrower and rationalization of income generation criteria following the recommendations of the Committee on Comprehensive Financial Services for Small Businesses and Low Income Households (Chairman: Shri Nachiket Mor). As regards financial stability related concerns, a revised regulatory framework was introduced in 2014 to ensure that only strong entities exist in the NBFC sector. Accordingly, the minimum amount of net owned funds or NOF for NBFCs registered before April 21, 1999 was stepped up to ₹ 20 million from ₹ 2.5 million and the capital adequacy framework was further strengthened. Furthermore, only rated NBFCs-D were allowed to accept public deposits for enhanced depositors' protection. In order to plug regulatory gaps to minimize regulatory arbitrage, the prudential norms for NBFCs, including asset classification and provisioning norms, were harmonized with those for banks in a phased manner. In September 2016, the RBI allowed the establishment of a new category of NBFCs NBFC Account Aggregator (AA) to provide a consolidated view of individual investors' financial asset holdings on a single platform, even for entities falling under the purview of different financial sector regulators. Recently, the RBI issued guidelines for regulating the NBFCs undertaking peer-to-peer ("P2P") lending activities.

Reflecting their ability to evolve as well as innovate, NBFCs have recorded robust growth in recent years. Moreover, their balance sheet performance has been better than banks on various parameters. Credit by NBFCs-ND-SI has risen strongly in recent years with a growth of 13% in 2016-17. This is in contrast to the slowdown in bank credit growth, especially in respect of public sector banks. As a result, the credit intensity, i.e., credit as per cent of GDP, of NBFCs-ND-SI has shown a steady increase, reaching 8 % in 2017.

b) Share in systemic credit:

NBFCs-ND-SI have traditionally funded both the industrial sector and the retail segment. While industry has received about two-thirds of the total credit by these companies, the share of retail credit has increased from 3.4% in 2014-15 to 15.6% in 2015-16 and 17.7% in 2016-17.

Several NBFCs-ND-SI specialize in financing niche segments, including the micro and small enterprises, which particularly figure prominently in the loan portfolios of NBFCs-MFI and loan companies. Over recent years, there has been a steady growth in the credit to MSE sector from these two categories. This was mainly on account of the revision in December 2015 in the returns filed by NBFCs.

c) Key recent trends:

The number of NBFCs has declined because of the regulatory initiatives aimed at protecting depositors' interests and safeguarding financial stability. Nevertheless, the overall balance sheet size of NBFCs has expanded with their credit growth recording a higher reading in 2016-17 when bank credit witnessed historically low growth. More importantly, credit to the micro and small segments, both in industry and services sectors, displayed robust growth. Financial performance of these companies came under stress with a decline in profitability and deterioration in asset quality. Their capital positions also deteriorated during 2016-17 though they remained well above the stipulated norms. Their exposure to sensitive sectors such as capital markets and real estate at 13.4% of their total assets as of March 2017 was marginally higher than the previous year. Notwithstanding a double-digit growth in public deposits mobilised by NBFCs, they remained well below one per cent of bank deposits. NBFCs took higher recourse to market-based instruments for resource mobilisation while reducing their dependence on bank borrowings. Conversion of a few large NBFCs-MFI into small finance banks may have implications for credit to the microfinance segment.

The latest developments suggest a healthy growth in NBFCs' credit during the first half of 2017-18 particularly in the retail and services sectors. A substantial improvement in credit to commercial real estate during the current year up to September portends well for economic activity. Available data also shows improvements in NBFCs' asset quality in the recent quarter pointing to the fading impact of demonetisation. The goods and services tax related adjustments may, however, need to be watched going forward.

d) Outlook on NBFCs:

NBFCs act as a critical cog in the credit system of the economy, by providing financial services with respect to products as well as customer and geographic segments at the grassroots level. As of March 2017, they accounted for 16% of the overall systemic credit.

NBFCs share in systemic credit growing steadily

Note: 1. Banks' credit includes outstanding of Regional Rural Banks (RRBs) and Cooperative banks;
 2. Capital market borrowing and External Commercial Borrowing (ECB) includes corporate bond, commercial papers outstanding; but excludes amount raised by banks & NBFC

The outstanding loans disbursed by NBFCs grew at a 19% CAGR since the fiscal year 2011-2012. The growth is distributed in various sectors. For instance, while the CAGRs of the top four segments (namely housing, infrastructure, auto and Loans Against Property (“LAP”), the Micro, Small and Medium Enterprises (“MSME”) and microfinance has been on the higher side. In contrast, the growth for construction equipment and gold has been at a rate of 1-2%. Consumer durables and educational loans, on the other hand, are the segments which are growing the fastest albeit from a relatively low base.

e) Key differences between Banks & NBFCs:

NBFCs lend and make investments and hence their activities are akin to that of banks; however there are a few differences as given below:

- i. NBFC cannot accept demand deposits;
- ii. NBFCs do not form part of the payment and settlement system and cannot issue cheques drawn on itself;
- iii. deposit insurance facility of Deposit Insurance and Credit Guarantee Corporation is not available to depositors of NBFCs, unlike in case of banks.

4. Indian wholesale lending industry overview

a) Market size, addressable opportunity & historical growth:

Wholesale finance includes the lending services to medium-to-large-sized corporates, institutional customers, real estate developers by banks and other financial institutions. Both long term and short term funding is encompassed in this portfolio. While long-term loans are driven by investment cycles, short-term loans are influenced by

business revenues and working capital requirements. NBFCs usually have limited exposure in long-term funding, except certain public NBFCs that cater to the infrastructure sector.

The AUM of wholesale financing NBFCs (excluding HFCs) has grown at a robust CAGR of 31% between 2012-2017, to touch a market share of ₹1.3 trillion by March 2017. In 2017, the government of India approved ₹ 2.11 lakh crore worth recapitalization plan for the public sector banks (“PSBs”). It is expected that the credit growth of banks in the corporate sector will remain muted over the next year as banks are still grappling with high GNPA’s in the corporate sector, leading to an overall slowdown in the growth for the industry. Despite the poor growth demonstrated by the banks in this segment, NBFCs, on the other hand, have been able to expand their market share to 9% from 5% during between fiscals 2012 and 2017, where the wholesale loans outstanding of NBFCs and HFCs together also grew at a CAGR of 23%. For details on the growth of the NBFCs in this segment, please refer to “ - Key growth drivers and expected growth over the next five year” on page 90.

Wholesale Finance-Total Outstanding
Poor growth in banking credit led to overall slowdown in outstanding growth for industry

E: Estimated

Note: Industry numbers are minus infrastructure and SME finance for banks and NBFCs, and includes developer loan as well as other large corporate loan portfolio of HFCs.

Profitability in the wholesale financing segment is comparably high, on account of low credit cost and high yields. Majority of the wholesale finance products offered are charged an interest rate between 11-19%. Real estate financing and structured finance products, however, are charged at higher rate of interest due to their riskier and more complex nature of business. Since the GNPA levels in overall wholesale finance are low for NBFCs, their credit cost is also correspondingly low.

Low credit cost and high yielding products kept profitability levels high of NBFCs

The varying return on asset, however, is expected to be stable at 3.0-3.5% over 2017-18 and 2018-19. The lower yields are anticipated to be offset by lower credit cost and reducing cost of funds.

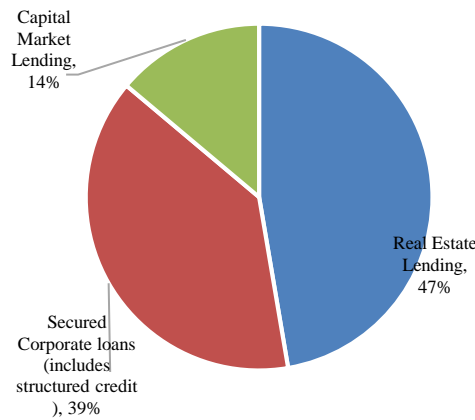

b) Breakup of wholesale credit:

The ticket size of loans disbursed vary from ₹ 500 million to ₹ 5000 million, with some NBFCs taking collateral cover as high as three times depending on the structure of the loan. LTV is typically 50-60% in order to alleviate the risks of high ticket size loans. Wholesale finance NBFCs offer funding which is industry-specific (such as real estate finance), structured and customized as per the needs of the borrower and suits the risk appetite of the respective NBFC. They offer products such as promoter funding, mezzanine funding, structured and acquisition financing, lending to real estate developers, etc. For wholesale NBFCs, developer finance (or real estate lending) accounts for ~47% of the loan book, as majority of the large players have significant exposure to the same.

The structured credit offered by NBFCs is fairly diversified with top four sectors i.e. auto and auto components, pharmaceuticals, logistics, real estate constituting 44% of overall portfolio. Banks have been cautious in lending to these sectors owing to rising NPAs in past few years. Majority of the portfolio of NBFCs is from tier I cities, which include Mumbai, Delhi NCR, Bengaluru, Chennai, Ahmedabad, Pune and Hyderabad, as exit options are difficult in smaller cities, especially in the real estate segment.

Real estate lending	Secured corporate loans (includes structured finance)	Capital market lending
<ul style="list-style-type: none"> Provides customised and structured loans to real estate developers for pre-approval/land financing and construction of commercial and residential properties Last stage financing for inventory funding 	<ul style="list-style-type: none"> Customized financing solutions to meet working capital and growth finance needs of corporate clients It includes : <ul style="list-style-type: none"> Vanilla term loans Working capital loans Structured finance 	<ul style="list-style-type: none"> Provides finance against capital market securities to customers to meet their liquidity requirements It includes: <ul style="list-style-type: none"> Promoter funding IPO funding Mezzanine financing Special situation and acquisition financing

Real estate financing accounts for majority share in overall wholesale credit, for the fiscal 2017, compared with structured credit and capital market lending. The same is evidenced in the pictorial representation provided below:

Breakup of Wholesale NBFCs portfolio

c) Asset quality trends:

Though banks' interest often fluctuate and plummet, NBFCs retain edge over banks by offering more complex, customized and structured deals. Despite maintaining a healthy asset quality with the GNPA's estimated to be below 1% as of March 2017, having a concentrated portfolio poses high risk to the NBFCs. For some NBFCs with relatively low market share, the GNPA stands at 'nil' also.

GNPA of NBFCs varies and is vulnerable to concentrated and a sizeable single borrower exposure, especially given the increasing exposure to real estate. While the security cover and finance structure is usually strong in real estate funding, monetizing and liquidating the pledged assets can prove challenging, as the ticket size is usually very high and risk is concentrated among few large borrowers. Hence, a loan default by a single borrower could result in high overall GNPA ratio level for the financing company. Considering the risk arising due to a concentrated loan portfolio of several players, the GNPA level is expected to be slightly higher than the current level aforementioned.

d) Market share between Banks & NBFCs:

Banks have a higher market share in wholesale lending *vis-à-vis* NBFCs. While most NBFCs have limited exposure in long-term funding, banks extend both long and short-term funding to diverse sectors. Within long-term loans, the infrastructure sector comprises a significant share. NBFCs that cater to the infrastructure sector usually have a mix of both long term and short term funding, but the sector continues to be largely serviced by banks. For the purposes of analysis, lending to the infrastructure sector is excluded, and loans offered to large corporates in non-infrastructure segments is covered. Banks continue to account for nearly 90% of the market of wholesale lending.

E: Estimated

Note: HFC portfolio includes only developer loan and other corporate loan

e) Key players in the segment & their market share:

Diversified players currently hold significant market share in wholesale lending business. The top four NBFCs in wholesale financing are: the Piramal Group (includes Piramal Enterprise Ltd and Piramal Finance Pvt Ltd), Aditya Birla Finance Ltd, Tata Capital Financial Services Ltd, and Edelweiss Financial Services Ltd. Together, these four players account for more than half of the overall wholesale financing by NBFCs. Though the sector is dominated by a restricted number of players, the focus of these NBFCs is diversified and varied. For instance, while Piramal has a greater presence in developer finance, Tata Capital and Aditya Birla Finance focus more on offering corporate loans.

Top four players constitute over 50% of the market among NBFCs

f) Key growth drivers and expected growth over the next five years:

The strong growth of NBFCs in the wholesale financing can be explained by a variety of factors; one of the foremost reason being the provision of customized solutions, with features such as interest moratorium and bullet repayment schedules, which are not offered by banks. NBFCs also extend such customized credit facilities to developers for land financing and early-stage project financing. A lower turnaround time, whereby the NBFCs usually disburse a large-ticket loan to a new customer within 45-60 days, is also another factor bolstering their growth. Customers often require funds in a timely manner, which is a service that NBFCs are successfully able to provide. On the other hand, public sector banks have considerably elongated decision making cycles, due to their aversion to risk and fragile capital position. Lastly, NBFCs have been able to cultivate strong relationships with their clients. This may be due to the presence of the NBFC in allied businesses, or because it is supported by well-established parent companies, aiding it to not only in securing the business but also in assessing the risks.

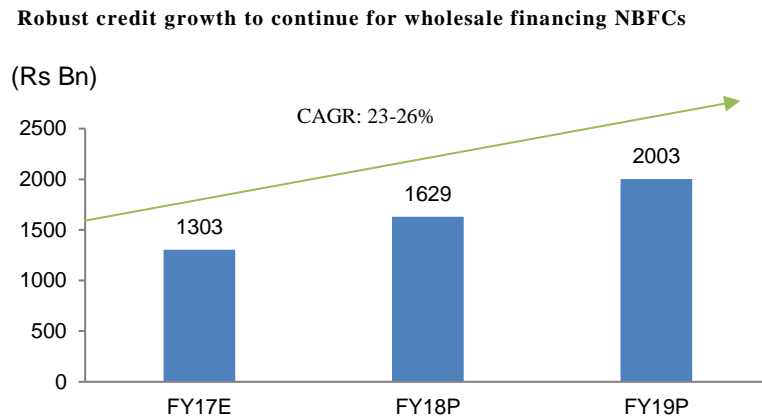

Strong growth in NBFC loan outstanding

In the long run, effective implementation of RERA is expected to improve transparency and timely delivery, ultimately benefitting the real estate sector. At the same time, there is a sense of concern and uncertainty in the markets as well. This sentiment is likely to persist till the market adjusts itself to RERA and is able to implement it effectively. RERA is eventually expected to instill more confidence in the market, particularly in financial

institutions while lending funds to builders and developers on account of having established a regulatory authority and laying down stringent compliances.

Despite these concerns, it is expected that the wholesale financing by NBFCs will grow at 23-26% CAGR to capture a market size of ₹ 2.0 trillion by end of fiscal year 2018-19. Moreover, the inability of PSBs to lend aggressively and implementation of RERA is expected to act as a growth catalyst. Emerging opportunities in areas such as affordable housing are also projected to aid the growth of this segment.

5. Housing Finance Industry Overview

a) Housing finance growth - Market size, addressable opportunity & historical growth:

The Indian housing finance market has grown rapidly, with mortgage lending significantly contributing to growth in construction and demand for housing. The National Housing Bank (“NHB”) was set up in 1988 as the apex institution for regulating and controlling housing finance companies in the country. Over the years, through its innovative measures, active guidance and appropriate regulatory interventions, NHB has significantly facilitated broadening and deepening of the housing finance market in the country.

For the NBFCs, housing finance occupies the second largest portfolio after infrastructure. The loan book for HFCs is expected to clock 17-19% CAGR, to reach a market share of ₹ 10.8 trillion in fiscal year 2018-19. This is aided by higher finance penetration and increase in demand for affordable housing. Initiatives by regulators to support affordable housing finance, such as NHB’s revision of interest spread cap for the Rural Housing Fund and reduction in risk weights have also assisted in the growth of the market.

b) Mortgage penetration – India vs. world:

The financial crisis of 2007-08 had a long lasting effect on the housing situation in different countries, which was evidenced by a downward trend in the housing prices all over the world. Different world economies have diverse housing patterns. The IMF Global Watch Report has classified these into three broad categories: i) The “Boom” economies where the drop in prices in the financial crisis period of 2007-2012 was modest and was followed by a quick rebound; (ii) “Bust and Boom” economies where housing markets rebounded post 2013, after falling sharply in the period 2007-2012; and (iii) the “Gloom” economies in which prices of houses fell substantially at the onset of the crisis and have remained on a downward path. India, being classified as a “boom” economy presents itself as an opportunity for the HFCs.

(Source: <https://nhb.org.in/wp-content/uploads/2018/02/T%20&%20P%202016.pdf>)

India’s mortgage-to-GDP ratio stood at a 10% rate for fiscal 2015-16, supported by factors such as ease of financing, tax incentives, rising incomes, improving affordability, growing urbanisation and equally importantly the widening reach of financiers. However, the mortgage penetration in the country lags 9-11 years behind other regional emerging markets, such as China and Thailand. Structural drivers such as urbanization, young population, smaller family sizes, urbanisation and rising income levels, etc. are expected to demonstrate healthy growth rates in the mortgage segment.

c) Market share between Banks & NBFCs – Last 5 years:

Housing finance is the second-largest portfolio, after infrastructure, for the NBFCs. The CAGR of the industry stands at 18-19%, whereas the CAGR of HFCs is approximately 22% in loan outstanding between 2011-12 and 2016-17. Both banks and HFCs offer mortgage backed loans, with the banks having a 60% share in the loan assets as of 2016-17. It is to be noted that the share of HFCs, has increased rapidly to 40% from 34% over the last couple of years, largely supported by their sharper focus on loan against property and developer loan segment. It is expected that the share of HFCs will increase.

Note: Includes the overall portfolio of HFC and only housing loans and developer loans of banks

While for HFCs, housing finance is their primary business activity, a large number of scheduled commercial banks have also focused on housing finance by creating separate housing finance verticals and leveraging their extensive branch network.

d) Asset Quality trends:

Given that a large portion of the demand for home loans comes from first time buyers, asset quality of the housing loan portfolios has remained low in the past. Seasoning of portfolios of rapidly growing HFCs could lead to a further increase in this segment. The GNPA of mid and small-sized HFCs is likely to be 0.90% to 1.2%, whereas that of large HFCs to be ~0.80%.

Over the last couple of years, the NPAs of certain HFCs have improved largely due to adequate appraisal systems and effective recovery mechanisms as well as better availability of information. Further, in order to mitigate the risks arising from exposure to higher geographical concentration, HFCs charge a higher yield and also use a unique assessment strategy, resulting in lower GNPA in the segment compared with banks.

Note: GNPA is calculated based on weighted average of 15 HFCs accounting for more than 95% of market share.

(Source: CRISIL Research Report on Housing Finance, 2017)

e) Key players in the segment & their market share:

HFCs can be categorised as large, medium and small size HFCs. Mid-size HFCs comprise of those HFCs with total retail housing loan outstanding of below ₹ 300 billion, as of March 2017. It is expected that with the focus of the mid-size HFC on affordable-housing projects and their relatively higher concentration in Tier-II and smaller cities, they will continue to grow. This expectation is bolstered by the growth for affordable housing projected to exceed overall housing demand growth.

Key players in the large HFCs' segment include Housing Development Finance Corporation, Dewan Housing Finance Corporation Ltd and Indiabulls Housing Finance and LIC Housing Finance. Mid and small HFCs include GIC Housing Finance, CanFin Home loans, Cent Bank Home Finance, Edelweiss Housing Finance, Gruh Finance, India Infoline Housing Finance, Mahindra Rural Housing Finance, MAS Rural Housing Finance, Tata Capital Housing Finance, L&T Housing Finance, Muthoot Housing Finance, PNB Housing Finance, Reliance Home Finance, SRG Housing Finance, Repco Home Finance and Shriram Housing Finance. Availability of debt and equity funding, strong origination skills and operating processes have also helped small and mid-sized HFCs gain sizeable market share.

f) Key growth drivers:

Higher transparency in the sector, increasing urbanisation and government's incentive coupled with an increased financial penetration in urban areas are primary growth drivers for the housing finance market for the next couple of years. Urbanization has a twin-fold impact: not only does it result in a rise in the number of nuclear families, leading to the formation of more urban households; it also reduces the area requirement per household. Demand for loans for new housing, one of the primary drivers in the HFC disbursements, has witnessed an increase with an increase in urbanization.

The Government has also taken key initiatives for improving the housing stock, such as simplification of foreign investment through automatic route, allowance of investment in real estate sector through REITs, and enabling affordable housing by facilitating availability of long term funds for developers and NHB. NHB has also allocated a sum of ₹ 60,000 million under the Rural Housing Fund and ₹ 30,000 million under the Urban Housing Fund. *Inter alia*, these initiatives aim to boost sales of affordable, low-cost housing units and consequently their financing also. Further, the Government of India has even launched the "Housing for All by 2022 Mission" to facilitate home ownership for every Indian household. The "Housing for All" scheme provides for a credit-linked subsidy component to be implemented through banks or financial institutions. Under this subsidy, home loans will be provided to eligible urban population for acquisition and construction of houses. Increase in urbanization, coupled with such schemes, also has a positive impact on the housing demand, thereby increasing the demand for its financing also.

g) Expected size over next 5 years:

For fiscal year 2017-18 and 2018-19, HFCs loan portfolio was expected to grow at a slower pace 16-18% CAGR largely due to RERA. However, due to HFCs’ strong origination skills, focused approach of catering to a particular category of customers, relatively superior customer service and diverse channels of business sourcing placed in the backdrop of increased urbanisation, the growth thereafter is expected to accelerate leading to a 18-20% CAGR over next five fiscal years.

HFC market to grow fast in long term

It is also expected that the market share of HFC will remain positively stable given their ability take more risk (resorting to various surrogates for credit assessment; hence providing higher LTV), faster turnaround times, higher builder tie-ups and less-stringent documentation processes. The projected market share of HFCs in housing finance market stands between 40-41% range in fiscal year 2018-2019.

Our Strengths

We believe the following are our principal strengths:

Experienced, highly motivated and dedicated management team

We have an experienced, highly motivated and dedicated senior management team, with significant experience in the banking, financial services, consultancy and infrastructure sectors. Pursuant to the change in control in November 2017, we appointed Keshav Porwal and Amit Sahai Kulshreshtha, as our Managing Director and Executive Director & CEO, respectively, and Vineet Kumar Saxena, as CEO of Capital India Home Loans in December 2017. Keshav Porwal, our Managing Director has approximately two decades of experience in the financing and real estate industry. Amit Sahai Kulshreshtha, our Executive Director and CEO has prior experience in investment banking, consulting and infrastructure sectors. Vineet Kumar Saxena, CEO of Capital India Home Loans, our wholly-owned subsidiary, has prior experience in the financial services sector, having been associated with Barclays Bank PLC, ICICI Personal Financial Services Limited and ICICI Bank Limited, among others. Our new and dynamic senior management team has already implemented a number of changes in the Company for steady growth of the business. One of the changes was to diversify from real estate lending focus to become sector agnostic and lend with a focus on good quality collateral asset. As a result, our real estate lending, in the Fiscal Year 2018 and the three-month period ended June 30, 2018, has come down to 37.0% and 27.4% respectively compared to 70.0% of our lending portfolio in the Fiscal Year 2017. Further, we believe that our dedicated senior management team has enabled us to attract experienced mid-level talented, growth-oriented professionals.

Institutional philosophy of prudent risk management controls through asset-backed lending and streamlined procedures

We maintain healthy and high-quality loan asset portfolio in synchronization with our institutional philosophy of lending against security, which we call asset backed lending. We have instituted prudent and comprehensive risk management controls, policies, and procedures that are critical for the long-term sustainable development of our organization. Our risk management committee which is a Board level committee oversees and monitors the overall credit risk management framework. Our credit risk governance framework comprises of primarily three-units, spanning across the (i) our business teams, that generates lead; (ii) the credit risk unit, that independently manages the risk, provides policy guidance, performs credit analysis, risk reporting and credit monitoring, and our credit risk unit comprises of various sub-units, such as credit underwriting and policy unit and portfolio monitoring unit, which are responsible for management of credit risks; and (iii) the internal audit unit, which independently assesses the design and operational effectiveness of the entire credit risk management framework. Our credit risk governance framework incorporates the requirement of senior management and credit committee approval, with built-in escalation matrices at pre-defined credit thresholds, which enables us to ensure that high-ticket advances are sanctioned by our senior management.

We have implemented enterprise-wide loan management system, *OmniFin*, which provides single platform operational support such as risk management, documentation management and customer service and consequently aids our decision-making. We are also integrating *OmniFin* with services of third-party credit assessment service

products, such as *Perfios - Insight* to increase the operational efficiency of loan disbursement and risk assessment processes. We believe that our streamlined credit risk governance framework and loan management system have contributed to our operational efficiency and enhances our ability to take prudent credit decisions.

As a result of our prudent risk management controls, our Company had no NPAs in the last three Fiscal Years and the three-month period ended June 30, 2018. Further, as of March 31, 2016, March 31, 2017, March 31, 2018 and June 30, 2018, Nil, 89.71 % (i.e., ₹ 785.00 million), 89.42 % (i.e., ₹ 929.43 million) and 88.79 % (i.e., ₹ 871.03 million), respectively, of our loans and advances relating to financing activity were secured.

Our Strategies

Following the change in control of our Company in November 2017, our Board has implemented initiatives to rejuvenate our institutional spirit. Some of the initiatives implemented by the new management include: (i) induction of the new senior management team having significant experience and a diversified track record in the banking, financial services, consultancy and infrastructure sectors; (ii) raise of capital through a preferential allotment in June 2018, wherein funds aggregating to approximately ₹ 2,500 million were mobilized for the business, operational and general corporate requirements of our Company; (iii) diversification from real estate lending focus to become sector agnostic lender; (iv) augmentation of the risk management controls; and (v) adoption of enterprise-wide loan management system, *OmniFin*, to increase the operational efficiency. While we intend to continue evaluating and implementing changes to enhance our scale of operations and increase our profitability, we intend to focus on:

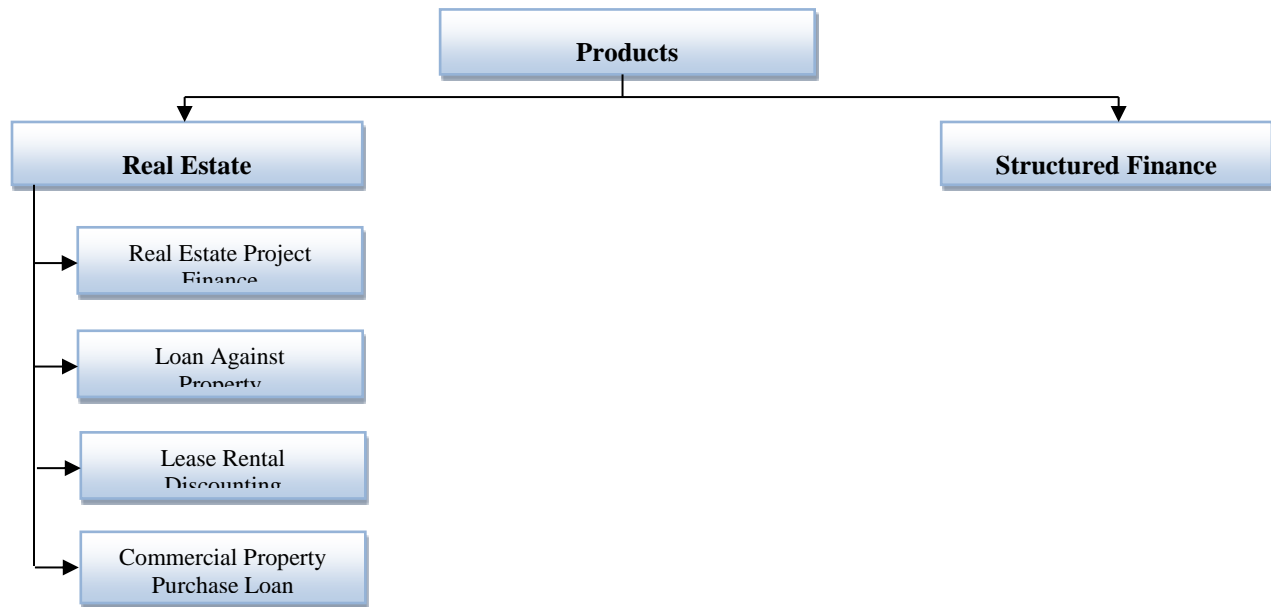

Further strengthening credit assessment and risk management procedures: In line with our institutional philosophy of implementing prudent risk management controls, we continuously endeavor to strengthen various aspects of our credit and risk management, including credit assessment and due diligence procedures for appraisal of the borrower's credit worthiness and mitigation of the credit risk. We are committed to efficiently maintain healthy and high-quality loan asset portfolio.

In relation to origination and appraisal of our advances, we propose to continuously review and upgrade our credit risk governance framework, including enhancing our resources. In addition, we are currently in the process of integrating our loan management system, *OmniFin* with services of third-party credit assessment service products, such as *Perfios - Insight*, which we believe would increase the operational efficiency of loan disbursement and risk assessment processes. For details, see “– Risk Management Architecture” and “– Information Technology” on pages 103 and 106, respectively.

Leverage on the relationship and experience of our senior management for business growth: We intend to continue growth at a stable but steady pace. Therefore, instead of focusing on opening of new branches, we wish to leverage the experience and business relationships of our senior management to grow our business. Our new senior management has a diversified track record that can help us identify suitable customers across industries which meet our risk appetite. We also believe our senior management's acumen of the market trends, demands and industry developments, would enable us to adapt and take advantage of market opportunities.

Also, see “*Risk Factor - Any adverse credit ratings in future could increase borrowing costs and adversely affect our access to capital and lending markets and could also affect our interest margins, business, results of operations and financial condition.*” on page 28.

ALM Policy

NBFCs are exposed to credit and market risks in view of the asset-liability transformation. With liberalization in Indian financial markets over the last few years, growing integration of domestic markets with external markets and entry of multinational corporations for meeting the credit needs of corporates and retail segments, the risks associated with NBFCs’ operations have become complex and large, thus requiring strategic management. As an NBFC, we are exposed to various kinds of risks including credit risk, interest rate risk, equity and commodity price risk, liquidity risk and operational risk. Moreover, intense competition has brought intense pressure on the management of the NBFCs to maintain a good balance among spreads, profitability and long-term viability. An effective, dynamic and integrated risk management system to address the issues relating to interest rates and liquidity risks has been addressed in the Asset Liability Management Policy (“**ALM Policy**”) adopted by our Board. The ALM Policy of our Company, has the objective of managing the assets and liabilities of the Company. It seeks to maximize stakeholders’ value,

increase capital, serve customers better, and protect the Company from any negative financial consequences arising from changes in interest rate, liquidity and operation risks.

Our ALM Policy includes the management of total balance sheet dynamics with regard to its size, quality and risk. Under this system of management, we have constituted an Asset-Liability Committee (“ALCO”), consisting of an Independent Director (Chairperson), the Managing Director, and the Chief Executive Officer. The objective of ALCO is to set policies and manage the structural balance sheet risks arising over time, monitor the external environment and initiate appropriate action after evaluating interest rate trends, market liquidity and other factors, fine tune product pricing, ensure adequacy of capital, and ensure regulatory compliance related to interest rates and liquidity risks, amongst others. We also maintain a Management Information System (“MIS”) for management of assets and liabilities with respect to the maturity mismatches and the other associated various risks. As per our ALM Policy, we cover (i) liquidity risk management (structural liquidity plan and dynamic liquidity plan), (ii) interest risk management system and (iii) funding and capital planning.

Credit Approval Procedure

The authority for approval of credit proposals is delegated by our Board to specific approval authorities, within the identified limits. The authorities exercise their powers within the framework of the norms prescribed by our Board. Certain guiding principles with respect to our credit approvals are enumerated below:

- *Risk based delegation:* Delegation of authority is risk based, which entails that the senior authorities and committees (with senior management personnel) approve the credit proposals with higher credit risk, higher exposure or the transactions /proposals which are more complex or have critical deviations from the standard norms;
- *Meeting /Desk based approval:* Approvals are either through convened meetings or through desk based in Loan origination system or through email approvals;
- *Adequate audit trail:* The credit risk unit maintains a central repository of ‘controlled copies’ of all approved cases and all such ‘controlled copies’ are kept on record such that there is adequate audit trail for all approvals/sanctions;
- *Non-transferability of authority:* No member is allowed delegate the individual authority to other official to attend the meeting and/or to constitute a quorum. In cases where the approval authority is unable to attend the meeting or is not accessible, specific approvals are taken from the MD /CEO and the proposal is subject to hindsight approval by the approving authority;
- *Adherence to regulatory/ internal guidelines:* While exercising the delegated powers, the restrictions or precautions advised by the RBI and any other regulatory body (if applicable) from time to time and the guidelines enunciated in this credit policy are followed;
- *Independence of approving authorities:* The delegated powers are not exercised by any member/official to the personal advantage of their own self or family members/related-party, directly or indirectly. Such credit proposals are referred to the next higher sanctioning authority;
- *Approval in line with the delegated authority:* The sanctioning committee/ authorities harmoniously work with the powers delegated to them. In cases where there is any ambiguity in the guidelines regarding delegation of powers, clarification is sought from the CRO /Head Risk;
- *Compliance to Company’s objectives:* The approval authorities exercise their powers with utmost caution without sacrificing the broad objectives of the credit policy and any other internal policy of the Company;

- *Approval backed by analysis:* All notes or proposals placed before the approving authorities are required to be in the prescribed format approved by the Company. Further, proposals are required to be backed by a proper assessment and justification of limits proposed; and
- *Hindsight review:* The higher-level sanctioning authorities review the sanction on a sample basis.

We have also instituted an escalation mechanism, which can be initiated where consensus is not arrived at by the sanctioning authority. Generally, escalation cases are presented to the sanctioning authority, a level above the sanctioning authority that originally reviewed the proposal. Further, we have set up an organizational framework for the sanctioning authorities, their composition is set forth below:

Particulars	Maximum Financial authority (group exposure)	Minimum Approving authority
Limit/Renewal of Existing Limits	Up to ₹ 250 million	CEO and Head Risk
	Up to ₹ 1,000 million	Credit Committee (Subordinate Committee)
	Above ₹ 1,000 million	Credit Committee of Board

Particulars	Maximum Financial authority (group exposure)	Minimum Approving authority
Short terms limits (Ad hoc facilities) (subject to maximum tenure of 90 days) For this facility, our Company's group exposure to borrower group shall not be considered	Maximum of ₹ 50 million	MD /CEO and Head Risk

In India, trademarks enjoy protection under both statutory and common law. Indian trademark law permits the registration of trademarks for goods and services. The Trade Marks Act, 1999 (“**Trademark Act**”) provides for the statutory protection of trademarks and prevention of the use of fraudulent marks in India. Certification marks and collective marks can also be registered under the Trademark Act. An application for trademark registration may be made by individual or joint applicants by any person claiming to be the proprietor of a trade mark, and can be made on the basis of either use or intention to use a trademark in the future.

Applications for a trademark registration may be made for in one or more international classes. Once granted, trademark registration is valid for ten years unless cancelled. If not renewed after ten years, the mark lapses. While both registered and unregistered trademarks are protected under Indian Law, the registration of trademarks offers significant advantages to the registered owner, particularly with respect to proving infringement. The Trademark (Amendment) Act, 2010 has been enacted by the GoI to amend the Trademark Act to enable Indian nationals as well as foreign nationals to secure simultaneous protection of trademark in other countries, and to empower the Registrar of Trademarks to do so. It also seeks to simplify the law relating to transfer of ownership of trademarks by assignment or transmission and to bring the law generally in line with international practice.

2.11 Retirement and other employee benefits

All employee benefits payable wholly within twelve months of rendering the service are classified as short term employee benefits. These benefits include salary, bonus, allowances and compensated absences. The undiscounted amount of short term employee benefits expected to be paid in exchange for the service rendered by the employees is recognised as an expense as the service is rendered by the employees.

The Company operates defined benefit plans for its employees pertaining to gratuity liability. The costs of providing benefits under this plan are determined on the basis of actuarial valuation at each year-end. Separate actuarial valuation is carried out using the projected unit credit method. Actuarial gains and losses for this defined benefit plans are recognized in full in the period in which they occur in the statement of profit and loss. Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. Actuarial gains/ losses are immediately taken to the statement of profit and loss and are not deferred. The Company presents the leave as a current liability in the balance sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date.

Non monetary assets and liabilities are carried at historical cost using exchange rates as on the date of the respective transactions.

2.15 Taxation

Income tax expense comprises current tax including minimum alternate tax ("MAT") (i.e. amount of tax for the period determined in accordance with the Income Tax Act, 1961) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the year).

The interim period income tax expense is calculated by applying, to the interim period's pre-tax income, the tax rate that would be applicable to expected total annual earnings, i.e., the estimated average annual effective income tax rate.

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognized to the extent there is virtual certainty of realization of such assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realized.

For the purpose of calculating diluted earnings per share, the net profit for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

2.18 Cash and cash equivalents

Cash and cash equivalents for the purpose of cash flow statement comprise cash in hand and cash at bank including fixed deposit with original maturity period of three months and short term highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

- c) Leasehold improvement includes all expenditure incurred on the leasehold premises that have future economic benefits. Leasehold improvements are written off over the period of lease.

Depreciation and amortization

- d) Depreciation / amortisation is provided over the useful life of the assets, pro rata for the period of use, on a straight-line method. The useful life estimates prescribed in Part C of Schedule II to the 2013 Act have been considered as useful life for tangible assets. Acquired intangible assets are amortised over a period as per management estimates of their useful life. Gains / losses on disposal of assets

- f) Losses arising from retirement or gains or losses arising from disposal of tangible and intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss.

2.4 Impairment of assets

The Group assesses at each balance sheet date whether there is any indication that an asset may be impaired based on internal/external factors. If any such indication exists, the Group estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit which the asset belongs to, is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the statement of profit and loss. If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciable historical cost.

2.5 Leases

The total lease rentals in respect of assets taken on operating lease are charged to the statement of profit and loss on a straight line basis over the lease term (in accordance with AS-19 'Leases' as prescribed by Companies (Accounting Standards) Rules, 2006).

Non current investments are carried at cost. However, provision for diminution in value is made to recognise a decline other than temporary in the value of the investments.

Profit or loss on sale of investments is determined on a first in first out basis. Any reduction in the carrying amount and any reversals of such reductions are charged or credited to statement of profit and loss.

All employee benefits payable wholly within twelve months of rendering the service are classified as short term employee benefits. These benefits include salary, bonus, allowances and compensated absences. The undiscounted amount of short term employee benefits expected to be paid in exchange for the service rendered by the employees is recognised as an expense as the service is rendered by the employees.

The Group operates defined benefit plans for its employees pertaining to gratuity liability. The costs of providing benefits under this plan are determined on the basis of actuarial valuation at each year-end. Separate actuarial valuation is carried out using the projected unit credit method. Actuarial gains and losses for this defined benefit plans are recognized in full in the period in which they occur in the statement of profit and loss. Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Group measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Group treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. Actuarial gains/ losses are immediately taken to the statement of profit and loss and are not deferred. The Group presents the leave as a current liability in the balance sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date.

Borrowing costs consists of interest and other cost that an entity incurs in connection with borrowing of funds. Borrowing costs are recognized as an expense in the period in which these are incurred.

2.12 Share issue expenses

Foreign exchange transactions are recorded the spot rate on the date of the respective transactions. Exchange differences arising on foreign exchange transactions settled during the period/ year are recognised in the statement of profit and loss for the period.

Monetary assets and liabilities denominated in foreign currencies as at the balance sheet date are translated at the closing exchange rates on that date; the resultant exchange differences are recognised in the statement of profit and loss.

Non monetary assets and liabilities are carried at historical cost using exchange rates as on the date of the respective transactions.

2.14 Taxation

Income tax expense comprises current tax including minimum alternate tax ('MAT') (i.e. amount of tax for the period determined in accordance with the Income Tax Act, 1961) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the year).

The interim period income tax expense is calculated by applying, to the interim period's pre-tax income, the tax rate that would be applicable to expected total annual earnings, i.e., the estimated average annual effective income tax rate.

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognized to the extent there is virtual certainty of realization of such assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realized.

MAT paid in accordance to the tax laws, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the Group will pay normal income tax in future years and is recognized as tax credit in statement of profit and loss.

2.15 Provisions and contingencies

The Group creates a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

2.16 Earnings per share

The basic earnings per share is computed by dividing the net profit / loss after tax attributable to the equity shareholders for the period by the weighted average number of equity shares outstanding during the reporting period. For the purpose of calculating diluted earnings per share, the net profit for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

2.17 Cash and cash equivalents

Cash and cash equivalents for the purpose of cash flow statement comprise cash in hand and cash at bank including fixed deposit with original maturity period of three months and short term highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

PRINCIPAL FACTORS AFFECTING OUR RESULTS OF OPERATIONS

We are a NBFC primarily engaged/focused in providing bespoke asset backed financing solutions to customers. We also generate additional income from services we provide as part of our financing products to supplement interest income. The following is a discussion of certain factors that have had, and we expect will continue to have, a significant impact on our results of operations:

Growth of our lending business

We have identified our lending business as our key focus areas to expand our presence in the financial sector. We are well placed to expand our lending business, through the acquisition of new customers, providing a convenient experience to customers and offering differentiated solutions to meet the specific needs of particular customer.

As part of our strategy to focus on our lending business, we intend to provide customized loan products and evaluate other financing opportunities. We are confident that customer service initiatives coupled with the use of technology will allow us to increase our presence in the lending market and secure both new and repeat business in our lending operations. That said, growth prospects in the lending business can be affected by a wide variety of factors including competition from other lenders, regulatory limitations on the products we can offer and markets we can serve, changes in access to adequate financing, increasingly sophisticated fraudulent borrowing and online theft and fluctuations in the credit markets and demand for credit. An inability to scale up our infrastructure and management to meet the challenges associated with expanding our lending business could cause disruptions to our operations and adversely affect our results of operations and financial condition. For further details, please refer to the “*Risk Factors*” on page 15.

Interest rate volatility

As we grow our lending business, changes in interest rates are expected to have significant impact on our business and operations. Finance costs are dependent on various external factors, including Indian and global credit markets and, in particular, interest rate movements and adequate liquidity in the debt markets. Changes in RBI repo rates could affect the interest charged on interest-earning assets and the interest rates paid on interest-bearing liabilities. Adverse conditions in the global and Indian economy resulting from economic dislocations or liquidity disruptions may adversely affect availability of credit, and decreased liquidity may lead to an increase in interest rates.

Interest rates have a substantial effect on our cost of funding, our business volumes and our profit margins. Declining interest rates may lead to increased prepayments and repricing of our loans as borrowers seek to take advantage of the more attractive interest rate environment to reduce their borrowing costs. Declining interest rates may also lead to a greater demand for additional borrowings as business owners seek to take advantage of lower interest rates, resulting in an increase in volume of lending business. Conversely, when interest rates rise, there are typically less prepayments and less pressure to reprice loans; there is also less demand for new funds, resulting in a decrease in volume of our

financing activities. In a rising interest rate scenario, our profit margins are therefore primarily dependent on our ability to attract new business, either through existing customers or new customers, than it is in a declining interest rate scenario. In addition, changes in interest rates also affect the interest rates we pay on our interest-bearing liabilities. Varying maturity periods applicable to our interest-bearing assets and interest-bearing liabilities and a consequent change in interest rates may result in an increase in interest expense relative to interest income leading to a reduction in our interest income from our lending business.

Availability of cost-effective funding sources

The availability of cost-effective funding sources significantly affects our results of operations. Our funding requirements are predominantly sourced through infusion of capital and loans from lenders. We have recently established relationships with various banks and lenders which would provide us ease of access and help in arranging sufficient term loans and working capital lines. Good relationships with public/private sector banking institutions will improve our credibility and provides ease of access to funds from such institutions at relatively lower costs. Our ability to maintain our finance costs at optimum levels will continue to have a direct impact on our profitability, results of operations and financial condition.

Credit quality, provisions and write-offs

Our NPA level is dependent upon our credit appraisal processes, internal process of evaluation of collateral, monitoring and recovery mechanism. The credit quality of our loans directly affects our results of operations, as the quality of our loan portfolio determines our ability to reduce the risk of losses from loan impairment. With the growth of our business, our ability to manage the credit quality of our loans will be a key driver of our results of operations, as quality loans help reduce the risk of losses from loan impairment and write-offs. We maintain credit quality based on verification of risk profile of borrower, source of repayment and the underlying collateral.

Macroeconomic Factors

As an NBFC operating in India, our financial performance may be impacted by the overall economic conditions in India, including the GDP growth rate and related government policies. Further, our financial results may be influenced by macroeconomic factors relating to growth of the Indian economy in general and the financial services industry in particular. We are also vulnerable to volatility in interest rates in India and regulatory changes applicable to NBFCs. Our business is subject to various other risks and uncertainties, including those discussed in “*Risk Factors*” on page 15. Any trends or events which have a significant impact on the economic situation in India, including a rise in interest rates, could have an adverse impact on our business.

Competition in our industry

The NBFC industry in India is characterized by high level of competition. The main competitive factors are product range, product customization, speed of loan approval, interest rate, reputation and customer relationships. We face our most significant organized competition from banks and other NBFCs who may have better access to and lower cost of funding than we do. They may also have better brand name and much larger customer base than us. If we are unable to access funds at an effective cost that is comparable to or lower than our competitors or build our brand amongst our target customer segment, we may lose existing as well as potential customers to our competitors, which may adversely impact our revenue and profitability.

SIGNIFICANT ACCOUNTING POLICIES

Acquired intangible assets

Intangible assets that are acquired by the Company are measured initially at cost. After initial recognition, an intangible asset is carried at its cost less any accumulated amortization and any accumulated impairment loss. If such recoverable amount of the asset or the recoverable amount of the cash generating unit which the asset belongs to, is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the statement of profit and loss. If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed, and the asset is reflected at the recoverable amount subject to a maximum of depreciable historical cost.

Leases

Assets acquired under lease other than finance lease are classified as operating lease. The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognized

only to the extent there is reasonable certainty that the assets can be realized in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognized to the extent there is virtual certainty of realization of such assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realized.

Changes in Accounting Policies

There has been no change in our accounting policies in the last five Fiscal Years.

Quantitative and Qualitative Disclosure about Market Risk

We are exposed to various types of market risks during the normal course of business such as operational risk, credit risk, interest rate risk, liquidity risk, cash management risk, asset risk and inflation risk. For details of our credit risk governance framework, see “*Our Business - Risk Management Architecture*” on page 103.

Operational Risk

Operational risks arise from inadequate or failed internal processes, people and systems or from external events. In order to control our operational risks, we have adopted well-defined loan approval processes and procedures. We also attempt to mitigate operational risk by maintaining a comprehensive system of internal controls, establishing systems

and procedures to monitor transactions, maintaining key back-up procedures and undertaking contingency planning. In addition, we have appointed Aneja Associates to conduct our internal audits to assess adequacy of and compliance with internal controls, procedures and processes. Reports of internal auditors as well as measures proposed on matters reported are discussed and reviewed at the meetings of our Audit Committee.

Asset Risk

Asset risks arise from decrease in the value of collateral over time. Sale price of a repossessed asset may be less than the amount of loan and interest outstanding and we may not be able to realize the full amount lent to our customers due to such a decrease in the value of collateral. Our employees are required to follow legal procedures and take appropriate care in dealing with customers while repossessing assets. We may also face certain practical and execution challenges while seizing collateral.

Credit Risk

We have instituted prudent and comprehensive risk management controls, policies, and procedures that are critical for the long-term sustainable development of our organization. Our risk management committee which is a Board level committee oversees and monitors the overall credit risk management framework. Our credit risk governance framework comprises of primarily three-units, spanning across the (i) our business teams, that generates lead; (ii) the credit risk unit, that independently manages the risk, provides policy guidance, performs credit analysis, risk reporting and credit monitoring, and our credit risk unit comprises of various sub-units, such as credit underwriting and policy unit and portfolio monitoring unit, which are responsible for management of credit risks; and (iii) the internal audit unit, which independently assesses the design and operational effectiveness of the entire credit risk management framework. Our credit risk governance framework incorporates the requirement of senior management and credit committee approval, with built-in escalation matrices at pre-defined credit thresholds, which enables us to ensure that high-ticket advances are sanctioned by our senior management.

Regulatory Risk

Our lending business is subject to various regulations relating to NBFCs. We are subject to various regulations and policies, including, but not limited to the regulations and directives framed by RBI. The RBI also regulates the credit outflow by banks to NBFCs and has issued guidelines to commercial banks with respect to their investment and credit exposure norms for lending to NBFCs, which makes us susceptible to these changes.

Interest Rate Risk

We are subject to interest rate risk, principally because we generally lend to customers at fixed interest rates and for periods that may differ from our funding sources, which bear fixed and/or floating interest rates. Interest rates are susceptible to a number of factors beyond our control, including monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions, inflation and other factors. We assess and manage interest rate risk on our balance sheet by managing our assets and liabilities in line with our asset and liability management policy.

Liquidity risk

Liquidity risk arises due to unavailability of adequate funds at appropriate prices or tenure. We attempt to minimize this risk through a mix of strategies, including assignment of receivables and short-term funding. We have recently established relationships with various banks and lenders which would provide us ease of access and help in arranging sufficient term loans and working capital lines. Monitoring liquidity risk involves categorizing all assets and liabilities into different maturity profiles and evaluating them for any mismatches in any particular maturities, particularly in the short-term. Through our asset and liability management policy, we cap maximum mismatches in various maturities in line with guidelines prescribed by the RBI.

Inflation risk

Inflation rates in India have been volatile in recent years, and such volatility may continue in future. A return of high inflation rates may result in an increase in overall interest rates which may adversely affect our results of operations. High inflation rate may also adversely affect the growth in the Indian economy and our operating expenses.

In case such Eligible Shareholders who are joint holders wish to renounce their Rights Entitlement, all such Eligible Shareholders who are joint holders would be required to sign Part B of the CAF. In absence of signatures of all joint holders, the CAF would be liable for rejection.

Nomination

Nomination facility is available in respect of the Rights Equity Shares in accordance with the provisions of the Section 72 of the Companies Act, 2013. An Eligible Shareholder can nominate any person by filling the relevant details in the CAF in the space provided for this purpose. In case of Eligible Shareholders who are individuals, a sole Eligible Shareholder or the first named Eligible Shareholder, along with other joint Eligible Shareholders, if any, may nominate any person(s) who, in the event of the death of the sole Eligible Shareholder or all the joint Eligible Shareholders, as the case may be, shall become entitled to the Rights Equity Shares offered in the Issue. A person, being a nominee, becoming entitled to the Equity Shares by reason of death of the original Eligible Shareholder(s), shall be entitled to the same advantages to which he would be entitled if he were the registered Eligible Shareholder. Where the nominee is a minor, the Eligible Shareholder(s) may also make a nomination to appoint, in the prescribed manner, any person to become entitled to the Rights Equity Shares, in the event of the death of the nominee during his or her minority. A nomination shall stand rescinded upon the sale of the Rights Equity Shares by the person nominating. A transferee will be entitled to make a fresh nomination in the manner prescribed. Where the Rights Equity Shares are held by more than one person jointly, the nominee shall become entitled to all the rights in the Rights Equity Shares only in the event of death of all the joint holders. Fresh nominations can be made only in the prescribed form available on request at the Registered Office of our Company or such other person or such addresses as may be notified by our Company. The Investor can make the nomination by filling in the relevant portion of the CAF. 1. to register himself or herself as the holder of the Equity Shares; or
2. to make such transfer of the Equity Shares, as the deceased holder could have made.

If the person being a nominee, so becoming entitled, elects to be registered as holder of the Rights Equity Shares himself, he shall deliver to our Company a notice in writing signed by him stating that he so elects and such notice shall be accompanied with the death certificate of the deceased Shareholder.

Further, the Board may at any time give notice requiring any nominee to elect to either be registered himself or herself or to transfer the Rights Equity Shares, and if the notice is not complied with within a period of 90 days, the Board may thereafter withhold payment of all dividends, bonuses or other moneys payable in respect of the Rights Equity Shares, until the requirements of the notice have been complied with.

Only one nomination would be applicable for one folio. However, new nominations, if any, by the Eligible Shareholder(s) shall operate in supersession of the previous nomination, if any.

In case the Allotment of Rights Equity Shares is in dematerialised form, there is no need to make a separate nomination for the Rights Equity Shares to be allotted in this Issue. Nominations registered with respective DP of the Investor would prevail. Any Investor desirous of changing the existing nomination is requested to inform its respective DP.

The RBI has, however, clarified in its circular, A.P. Accordingly, Shareholders renouncing their rights in favour of erstwhile OCBs may do so provided such Renounee obtains a prior approval from the RBI. On submission of such approval to us at our Registered Office, the erstwhile OCB shall receive the Abridged Letter of Offer and the CAF.

Restrictions on Foreign Ownership of Indian Securities

Foreign investment in Indian securities is regulated through the Consolidated FDI Policy and FEMA. The government bodies responsible for granting foreign investment approvals are the concerned ministries / departments of the Government of India and the RBI. The Union Cabinet has recently approved phasing out the FIPB, as provided in the press release dated May 24, 2017. Accordingly, pursuant to the office memorandum dated June 5, 2017, issued by the Department of Economic Affairs, Ministry of Finance, approval of foreign investment under the FDI policy has been entrusted to concerned ministries/departments.

Subsequently, the DIPP issued the Standard Operating Procedure (SOP) for Processing FDI Proposals on June 29, 2017 (the “**SOP**”). The SOP provides a list of the competent authorities for granting approval for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under automatic route but which required Government approval earlier as per the extant policy during the relevant period, the concerned administrative ministry/department shall act as the competent authority (the “**Competent Authority**”) for the grant of *post facto* approval of foreign investment. In circumstances where there is a doubt as to which department shall act as the Competent Authority, the DIPP shall identify the Competent Authority.

The GoI has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails. The Consolidated FDI Policy, issued by the DIPP, consolidates the policy framework in place as on August 27, 2017, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore the Consolidated FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the existing policy of the Government of India, erstwhile OCBs cannot participate in this Issue.
