INDIA'S HOBBOLED PATH FOR HYBRIDS

We believe prospects for India's hybrid segment are hobbled by demanding drivers and slim benefits. High costs and low relative returns to users and the planet make hybrids a weak investment for the government by way of incentives. EVs - the end game - qualify better.

What's inside

- *Hybrid tech and how it works for India vs RoW*
- *TCO comparison - HEV vs other techs (ICE, EV, CNG) in various scenarios*
- *Incentives required to make hybrids viable - at what cost?*
